

# The NEW LIGHT OF MYANMAR

## Farmers enjoying better life in Magway Township

In Magway Division, a central part of Myanmar, edible oil and other crops well exceed the demands. So, it distributes surpluses of crops to other regions.

Last paddy season, the region put

paddy.

Our news crew was accompanied by Secretary of Magway District Peace and Development Council U Than Aung, Chairman of Magway Township PDC U Hla Shaung and Assistant Director U Thein

rainfall in the region. In contrast, I witnessed thriving monsoon paddy fields grown with irrigation water from Thaphanseik

Dam along the project area.

After a fairly long drive, we arrived at Htonpauktaw Village-tract constituted with five villages — southern Htonpauktaw, northern Htonpauktaw, Kan, Alechaung and Thaphanseik villages.

We saw some young female workers transplanting paddy under the glare of the sun along with owners of the paddy field U Aung Shin and Daw Mya Kyin.

The chairman of the Township PDC introduced the farmer couple to us.

*(See page 11)*

### How to gain wealth

For your wealth to endure

- Save it
- Accumulate it
- Associate with good friends, and
- Use it moderately.

*These four are sure to bring you great wealth.*

### Four political objectives

- \* Stability of the State, community peace and tranquility, prevalence of law and order
- \* National reconsolidation
- \* Emergence of a new enduring State Constitution
- \* Building of a new modern developed nation in accord with the new State Constitution

### Four economic objectives

- \* Development of agriculture as the base and all-round development of other sectors of the economy as well
- \* Proper evolution of the market-oriented economic system
- \* Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- \* The initiative to shape the national economy must be kept in the hands of the State and the national peoples

### Four social objectives

- \* Uplift of the morale and morality of the entire nation
- \* Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- \* Uplift of dynamism of patriotic spirit
- \* Uplift of health, fitness and education standards of the entire nation

## PERSPECTIVES

Thursday, 17 September, 2009

### Extend networks of motor roads and railroads

The flow of goods increases in proportion to socio-economic development. The government is building networks of roads and bridges across the nation to cope with increased population and rapid urban and rural development.

Township development affairs committees are also building new roads in urban and rural areas. In 1988, there were more than 5,000 miles of roads but now the total length of roads reached over 30,000 miles. Moreover, as inter-district roads, new motor roads and railroads are being constructed in every region, networks of roads have increased.

Mountainous terrains of the Bago mountain range being natural barriers, travel between the regions east of the Bago mountain range and those west of it, takes a long time. Now, the Pyay-Paukhaung-Ottwin-Toungoo road, which is going to be more than 100 miles long, is being upgraded and over 60 miles have been tarred.

In addition, the Pyay-Paukhaung-Toungoo-Nay Pyi Taw railroad project is about to be implemented and it is going to be about 120 miles long. Arrangements are being made to search the axis for the railway and the site for the construction of Paukhaung station.

The motor roads and railroads have been built across the Bago mountain range, people will be able to travel the eastern and western parts of Bago Division easily and in a short time. Improvement in transport across the division will contribute a lot to health, education and economic status of local people.

If ministries concerned, regional authorities and organizations and workers try to meet the required standards in building motor roads and railroads across the Bago mountain range and work hard in concert to complete them within the target date, local people will soon be able to travel from one region to another all the year round and do their businesses quickly.

### Talks on Computer Networking coming soon

YANGON, 16 Sept—With a view to improving of ICT and flourishing of Computer Networking subjects among Myanmar youths, NetInfo ICT Training Centre will organize a talk at Conference Hall of Myanmar InfoTech in Hline Township here on 19 September.

The talks with its topic “Computer Networking Opportunity with Cisco CCNA” focuses on how to get a certificate in internationally recognized CCNA Networking subject.

Those who have passed matriculation exam, computer science students and students specialized in engineering may attend the talks for free. For further information, contact NetInfo ICT Training Centre, Ph: 507045, 652248.—MNA

## People's Destic

- \* Oppose those relying on external elements, acting as stooges, holding negative views
- \* Oppose those trying to jeopardize stability of the State and progress of the nation
- \* Oppose foreign nations interfering in internal affairs of the State
- \* Crush all internal and external destructive elements as the common enemy

## Court rules of conducts and rights of defendants

*A Legal Observer*

Having a look back at the historical background of the Myanmar judicial sector, the country has been adjudging cases with judges and tribunals in accordance with traditional code of laws, criminal laws, and court traditions since the time of monarchs.

After the British annexation of Myanmar, predominant legal practices were replaced with the legal systems of the British. After the release from the colonial rule, the nation continued to exercise the British legal systems, making necessary amendments to them to conform with the customs and traditions of the people as far as possible. Now, the country adjudges cases under existing laws such as Criminal Law, Penal Law, Civil Procedure Code, Evidence Law, and Privilege and General Law. In the process, the nation has constantly enacted and practised the right of defence and appeal as a fundamental legal principle.

Regarding cases, the plaintiff organization concerned has the rights to file a lawsuit to offenders in a cognizable offence; and the plaintiff concerned, to complain to the court in a non-cognizable offence. In a case, when the defendant appears, the court concerned has to examine the plaintiff or complainant and the plaintiff witnesses. Since the examination, the accused can argue in person or with a representative on his behalf. After examining the complainant and plaintiff witnesses, the court has to release the accused if he is not found guilty.

If there are some profound statements of the plaintiff witnesses that apparently prove the defendant guilty, the defendant is charged under the sections he has violated. If the defendant pleads guilty, he is sentenced to a reasonable term. And if he pleads not guilty, he can re-examine the plaintiff witnesses. Then, the court examines the defendant and the witnesses submitted by him, and hears the statements of the plaintiff and the defendant. If the defendant's arguments are found dominant over and refuting the accusations of the plaintiff, the defendant is acquitted. If the plaintiff is not satisfied with the judgment to acquit the defendant, he can appeal against the decree to the courts at different levels.

If the defendant is found guilty according to the statements of the plaintiff and plaintiff witnesses, and he cannot refute the accusations against him, he is to be sentenced to a reasonable punishment. Here, if the accused is not satisfied with the decree to punish him, he can submit an appealing or revision case to the higher court. The types of the decrees against which the defendant may submit an appealing or revision case are

prescribed in Code of Criminal Procedure. That is the right bestowed upon the accused in line with the judicial principle and provisions of the law.

In appealing against the verdict, the defendant may submit an appealing case with an application form to the court concerned in person or with a representative on his behalf. If the defendant is already serving the prison term, he has to submit the appealing form through the officer in charge of the prison concerned. In this regard, the appealing form is to be attached with a duplicate of the court's decree.

When the tribunal receives an appealing form, it has to register the case in the appealing register book, and to ask the original court to send the case file to it. The tribunal has to fix a date on which it will have to decide as to whether it should accept the appealing case or not for the applicant or his representative. If the defendant is a prisoner, there is no need to summon him to the court for his statements. After hearing the argument submitted by a representative on his behalf, the court has to deliver an order that it accepts or dismiss the case. If the appealing case is accepted, the court has to hand down an order in line with the law, after hearing the argument submitted by his representative and the statement by the law officer concerned. In pronouncing a judgment, the defendant does not need to appear in the court if he is serving a term. Second para of Section (424) of Criminal Procedure Code says “unless the appellate Court otherwise directs, the accused shall not be brought up, or required to attend, to hear judgment delivered.” According to the practices of the courts, any defendants are not sent to the tribunal.

If the court of appeal dismisses the appealing case, the defendant can submit a revision case to the higher court. And if the higher court dismisses the revision case, the defendant can submit a special appealing case under Section 7 of Judicial Law. If the Supreme Court decides to hear the special appealing case, the case is to be judged by a special court of appeal comprising at least three Supreme Court judges.

These points are the rights bestowed on those accused under Myanmar's Judicial Principle, Judicial Law and Criminal Procedure Code. Courts hear criminal cases in accordance with the existing laws, and the accused are given rights to argue, submit appealing cases and criminal provision cases. Therefore, it is fair to say that Myanmar's judicial practice meets the judicial principles.

### Applied Google Earth Course on 20 Sept

YANGON, 16 Sept—Myanmar Info Tech, The Myanmar Credential Technology will conduct Applied Google Earth Course at the Myanmar Computer Federation at Room (4), Building (1), e-Learning Center,

Myanmar Info Tech, Hline Township, Yangon, from 9 am to 4 pm on 19 and 20 September.

Those wishing to attend the course may sign up, dialing Ph: 652285 or 652286.—MNA

### MCPA to give talks on “ITPEC Exam”

YANGON, 16 Sept—To develop the information and communication technology, talks on “ITPEC Exam” will be conducted at Myanmar InfoTech in Hline Township on 19 September. The information technology examination and

job opportunities for the ITPEC degree holders will be explained.

Anyone may attend the talks at 9.30 am on 19 September and more information for the talks is available at MCPA, Ph 652276.—MNA

## Roadside bomb damages German forces' vehicle in Afghanistan

KABUL, 16 Sept—A roadside bomb damaged military vehicle of German troops in Takhar Province, northeast Afghanistan, an official with the German troops in the neighbouring Kunduz Province Nasir Alkozai said on Wednesday.

“The incident occurred late Tuesday evening outside provincial capital Taliqan next to an airstrip, as a result a military armored personal carrier was damaged,” Alkozai told *Xinhua*.

Quoting a German brigadier Shcrghinj with Germany's Provincial Reconstructing Team (PRT) in Kunduz Province, Alkozai added that there were no casualties on the troops.—*Xinhua*

A destroyed vehicle is towed away following a car bomb close to the Iraqi health ministry in Baghdad. Nine people — including four members of a Sunni militiaman's family — were killed in Iraq in attacks that also left 38 wounded.—INTERNET

## Roadside bomb wounds two in W Afghanistan

KABUL, 16 Sept—A roadside bomb struck one government vehicle in Heart Province west of Afghanistan on Tuesday, wounding two persons including a child, police said.

“It was 01:00 pm local time when a roadside bomb planted by rebels hit a car of Rural Development Department injuring the driver and a child,” deputy to provincial police chief Dilawar Shah Dilawar told *Xinhua*.

Meantime, a shadowy militant group introduced itself as Al-Fatah claimed of responsibility.

Unknown man, who speaks for the group told media via telephone from undisclosed location, claimed that fighters loyal to Al-Fatah which is different from Taleban carried out the attack.

## Man killed after firing on US helicopter in Iraq

BAGHDAD, 16 Sept—US and Iraqi forces killed one fighter, captured another and seized a truck loaded with weapons in an area of northern Iraq that remains an insurgent stronghold, the American military said on Monday.

American and Iraqi ground forces backed by a US helicopter attempted to stop a suspicious truck near Tal Abta, about 50 miles (80 kilometers) west of the volatile city of Mosul, said US military spokesman Maj Derrick Cheng.

The helicopter came under fire on Sunday and responded with rocket and small arms fire that disabled the truck and killed one of the insurgents, he said.

The American military says Mosul is the last urban battleground of al-Qaeda in Iraq and other Sunni extremists, and the level of violence there remains high, even as it has significantly dropped elsewhere in the country.

## Mortars hit Baghdad Green Zone during Biden visit

BAGHDAD, 16 Sept—Militants fired several mortars or rockets at Baghdad's fortified Green Zone government district on Tuesday shortly after US Vice President Joe Biden flew in, underlining the fragility of Iraq's security gains.

Iraqi police said one mortar round killed two Iraqi civilians and wounded five when it blasted an apartment block in the zone. Another two rounds landed near the sprawling US embassy compound, but did not hit it.

Police had no further reports of casualties.

## Britain must cut spending to reduce debts

LONDON, 16 Sept—British Prime Minister Gordon Brown acknowledged for the first time on Tuesday that hard economic times will mean substantial cuts to government spending on the country's already strained public services.

The announcement, which reverses overly optimistic statements about economic growth, sets the stage for a bruising general election battle with the opposition Conservative Party over who can best manage the country's dwindling financial resources.

"Labour will cut costs, cut inefficiencies, cut unnecessary programmes and cut lower priority budgets," Brown told a conference of the Trades Union Congress in the northern English city of Liverpool.—Internet

## North Korean ship fights off Somali pirates

KUALA LUMPUR, 16 Sept—Somali pirates tried but failed to hijack a North Korean cargo ship when crew members fought back with molotov cocktails and sped away, a maritime official said on Tuesday. Separately, other Somali pirates released a Greek-managed ship with 22 Filipino crewmen after five months in captivity, officials in the Philippines said.

The North Korean ship was adrift off the Somali coast near Mogadishu on 5 Sept for engine work when the crew saw 10 pirates approaching in two speedboats, said Noel Choong, who heads the International Maritime Bureau's piracy reporting centre in Kuala Lumpur.—Internet

## Fla student stabbed to death in fight at school

Two women wait on word about their children from the Coral Gables High School after a student was stabbed to death and another taken into custody, on 15 Sept, 2009 in Coral Gables, Fla.—INTERNET

MIAMI, 16 Sept—One student stabbed another to death during a fight on Tuesday in a courtyard at their suburban high

school, authorities said.

School officials identified the victim as 17-year-old sophomore Juan Carlos Rivera. Police identified the attacker as 17-year-old Andy Jesus Rodriguez, who was taken into custody immediately after the stabbing at Coral Gables Senior High School.

He was charged with second-degree murder, according to an arrest affidavit.

School Superintendent Alberto Carvalho said a fight happened sometime after 9 am as students moved from first- to second-period classes.

He could not say what the two students were arguing about or how many others saw the stabbing.

## Fatah accepts Egypt's proposal to end Palestinian strife

GAZA, 16 Sept—Fatah movement accepted an Egyptian proposal to delay general Palestinian elections to allow for more time for achieving Palestinian reconciliation, a Fatah official said on Tuesday.

The Egyptian proposal calls for holding general Palestinian elections by the middle of next year so as to boost reconciliation between Palestinian President Mahmoud Abbas' Fatah party and

the Hamas movement.

"Fatah has told Egypt that its proposal has been accepted," Abdullah Abdullah, a member of Fatah revolutionary council, told *Xinhua*.

"The Egyptian document stressed that the elections must be held by the middle of next year and this gives the factions more flexibility to set a suitable date for holding the elections," Abdullah said.

Abbas had called for

the elections on 25 Jan, 2010 when Hamas' term in the parliament expires. Hamas won the parliament elections in 2006.

Hamas, which controls the Gaza Strip, promised to respond to the Egyptian initiative after the end of Muslim's fasting month of Ramadan.

## US spends \$75 bln a year on intelligence

WASHINGTON, 16 Sept—A US top intelligence official disclosed on Tuesday that the country has spent about 75 billion US dollars a year on intelligence.

Director of National Intelligence Dennis Blair told reporters when he introduced his 2009 National Intelligence Strategy, that intelligence activities across the government and military cost a total of 75 billion dollars a year, which accounts for more than 10 percent of the annual US defence budget at 650 billion dollars or so.

The strategy includes the full budget figure for the national intelligence programme, including the government's 16 intelligence agencies and the military counterparts.

It was the first time for the US government to disclose the overall cost of intelligence activities including those related to the military.—*Xinhua*

## EAC facing pressure to sign economic partnership agreements

KAMPALA, 16 Sept—The East African Community (EAC) is facing pressure to sign the Economic Partnership Agreements (EPA) with the European Union (EU), a Ugandan senior government official said here on Tuesday. Rashid Kibowa, commissioner for Economic Affairs at the Ugandan Ministry of EAC Affairs, told *Xinhua* in an interview that the signing of the agreement between the EU and the regional economic bloc, the Com-

mon Market for East and Southern Africa, is making the EAC to expedite the negotiation process. "Other regional economic communities like COMESA and some countries in SADC (the Southern African Development Community) have already signed the framework agreement, if we don't sign, then they can always leave us out," he said.

"If we don't sign, then our exports to the EU will begin attracting a lot of du-

ties," said the commissioner, adding that the EAC is studying the agreement signed between COMESA and the EU and is picking out the best provisions before signing. Kibowa noted the EAC is concerned about the supply-sided constraints the region is facing, which may not favor it even when the EU opens its markets. "We still have rigidities here which may not enable us to produce and tap into the opened market," he said.—Xinhua

## IATA predicts \$11 bln loss for world airlines in 2009

HOUSTON, 16 Sept—World airlines are likely to post a worse-than-expected loss of 11 billion US dollars this year, as the global economic downturn takes a heavier toll than the 9/11 attacks, an industry association said on Tuesday. The International Air Transport Association (IATA) also revised its loss estimates for 2008 from 10.4 billion to 16.8 billion dollars. The losses in 2008 and 2009 combined totaled 27.8 billion, giving the industry its worst two-year performance in history.

"The bottom line of this crisis ... is larger than the impact of 9/11," said Giovanni Bisignani, IATA's director general and CEO. Industry losses for 2001-2002 were 24.3 billion dollars.—Xinhua

## APEC annual emergency management forum opens in Vietnam

At the forum, entitled "APEC Emergency Management CEOs' Forum 2009", delegates will re-

## Doha Round talks not optimistic despite positive signs

GENEVA, 16 Sept—Many analysts are still pessimistic about the outlook of the Doha Round of global trade negotiations, despite recent positive signs.

Following a mini-ministerial meeting held on 3-4 Sept in New Delhi, senior officials of key WTO members agreed here on Tuesday on a work plan aimed at pushing forward the long-stalled negotiations in the next few months, which was claimed as a Doha Round breakthrough.

But many analysts see these positive signs as superficial, as the tough issues that have blocked the talks since their launch in 2001 are still unresolved and key WTO members are not moving their positions. The issues involve farm tariffs and subsidies as well as industrial market access. The meeting in New Delhi, which was attended by more than 30 trade ministers, reiterated a WTO goal to conclude the whole round of talks by

the end of 2010.

As a follow-up to that meeting, senior officials from major WTO members gathered in Geneva on Monday and Tuesday, and they managed to map out a detailed plan for negotiations in the next three months, trade sources said.

The senior officials also pledged to reconvene in Geneva in October, November and December to advance the plan, the contents of which have not yet been disclosed.—Xinhua

## Eurozone labour costs rise by 4% in Q2

BRUSSELS, 16 Sept—Total hourly labour costs in the Eurozone rose by 4 percent in nominal terms in the year up to the second quarter of 2009, the European Union (EU)'s statistics bureau Eurostat said on Tuesday.

In the previous quarter, the Eurozone labor costs grew by 3.6 percent over a year ago, according to revised figures.

The two main components of labour costs are wages and non-wage costs. In the euro zone, wages and salaries grew by 3.9 percent in the year up to the second quarter of 2009, and non-wage costs by 4.2 percent, compared with 3.4 percent and 4.1 percent respectively for the first quarter of 2009

*The new electric powered cars of Renault are seen on the first press day of the Frankfurt Auto Show in Frankfurt, Germany, on 15 Sept, 2009. The car fair run through on 27 Sept.—INTERNET*

## Automakers try to energize electric-car business

FRANKFURT, 16 Sept—The race is on among the world's auto companies to make electric cars go farther on a single charge, bring the price down to compete with gas-powered vehicles, and give drivers more places to recharge them than just the

family garage.

Electric is the big buzz at the 63rd Frankfurt Auto Show this week, and nearly every major automaker has at least one on display. Renault introduced no fewer than four electric models, while Tesla, the only company producing and selling purely electric cars, handed over the keys to its 700th all-electric vehicle, a blue Roadster Sport, to a German buyer at the show.

If the models unveiled on Tuesday are any indication, the notion of electric cars as small, stunted boxes with little range is about to be junked.

"People have realized that ... electric vehicles don't have to be golf carts," said Diarmuid O'Connell, vice president of business development for Tesla Motors Inc. "They don't have to be anemic little putt-putts."

## HP upgrades notebook lines with thin, stylish models

SAN FRANCISCO, 16 Sept—Hewlett-Packard Co (HP), the world's largest personal-computer maker, on Tuesday unveiled a number of new models across its notebook lines with the aim to feed consumers' strong appetite for portable computers during the economic downturn and to maintain its leadership on the global market.

The upgrades of HP notebook lines include the introduction of anew ENVY sub-brand, representing the company's expansion into the high-end notebook category. HP said it plans to launch two models, ENVY 13 and ENVY 15, in the United States on 18 Oct. with the starting price of 1,699 US dollars.

Each of the models is about 1-inch (2.54-centimeter) thin with the ENVY 13 weighing 3.74 pounds (1.7 kilograms), and looks very similar to Apple Inc's unibody MacBook Pro notebook. The ENVY 15, to use the future Intel Core i7 processor, is billed as HP's fastest consumer notebook. "HP ENVY includes the latest in materials and technology inside and out and pushes the technological and performance boundaries of what can be done in sleek, powerful and lightweight notebook PCs," Ted Clark, a senior vice president of HP, said in a statement.—*Xinhua*

## UN General Assembly opens 64<sup>th</sup> session

UNITED NATIONS, 16 Sept—The United Nations General Assembly opened on Tuesday its 64<sup>th</sup> session here at the UN Headquarters in New York, with veteran Libyan diplomat Ali Abdussalam Treki at the helm.

"The United Nations must be reformed and must gain international legitimacy, ensuring that its voice is heard and respected and its resolutions applied," Treki told delegates at the opening session.

"It is vital to reform the Security Council and to reform the General Assembly so that they can comprehensively fulfill their roles," he said.

The GA president's speech also touched upon other key issues relating to the 192-member body's work, including counter-terrorism, the Middle East peace process, development, climate change and non-proliferation. "We have all condemned terrorism, which causes instability and endangers the international community," Treki said. "Yet despite our joint efforts and resolutions, terrorism continues to grow and spread."

"We must address its roots and take a close look at its causes and contributing factors. This is true of terrorism carried out by individuals, groups and states; state terrorism is the harshest form of terrorism," he stated.—*Xinhua*

## CO2 linked to Antarctic ice cap formation

CARDIFF, 16 Sept—UK and US scientists have linked, for the first time, declining carbon dioxide levels and the formation of the Antarctic ice caps 34 million years ago.

The team of scientists from Cardiff, Bristol and Texas A&M universities extracted microfossils in samples of East African rocks that show the level of CO2 in the Earth's atmosphere at the time of the formation of the ice-caps.

"About 34 million years ago the Earth experienced a mysterious cooling trend," said Cardiff University Professor Paul Pearson, who led the study. "Glaciers and small ice sheets developed in Antarctica, sea levels fell and temperate forests began to displace tropical-type vegetation in many areas. The period, known to geologists as the Eocene-Oligocene transition, culminated in the rapid development of a continental-scale ice sheet on Antarctica, which has been there ever since."—*Internet*

### Shotgun-wielding man Tasered after manure dispute

Police said a dispute over manure led to a man firing his shotgun near his neighbors and police later using a Taser to subdue him. *The Saginaw News* reported the man approached his neighbours in Huron County's Huron Township, about 110 miles north of Detroit, on Saturday as they spread lime and manure on their farm. Police said the 45-year-old fired his shotgun and then aimed the gun at the couple as they approached the fence in their tractor. Authorities said the disagreement over the placement of the manure had been ongoing. Officers responded and a Taser was used to subdue the suspect, who was held in the county jail pending charges.

*Guenter Grass, stands in front of a self-made sculpture in the northern German town of Luebeck on Sunday. The sculpture, which depicts a hand holding a fish, is part of an exhibition to mark the 50<sup>th</sup> anniversary of Grass' acclaimed book "The Tin Drum." The book, which chronicles the life of the young boy Oskar Matzerath in Grass's home town of Danzig, is considered one of the most significant postwar literary works.*

## Man cited for cursing in public under 1887 law

A man was cited for cursing in public under a local law created back in 1887. Police said a 19-year-old man was cited on Wednesday after he yelled obscenities at officers who had earlier given him a ticket for underage drinking. Officers said they could hear the man cursing at them from a block away. Several neighbours said they also heard the shouting.

Police normally issue disorderly conduct tickets in similar situations, but Deputy Police Chief Tom Williams said officers use discretion to choose the most appropriate charge.

Violating Winona's obscenity law is a misdemeanor, with a maximum penalty of 90 days in jail and a \$1,000 fine.

## Gravel Roads opened in Laymyathna, Hinthada

YANGON, 16 Sept—Minister for Progress of Border Areas and National Races and Development Affairs Col Thein Nyunt on 14 September met with members of township social organizations, townsenders, and members of ward Peace and Development Councils at the office of Laymyathna Township PDC.

The minister then attended the opening of gravel road section-1 of Aingthabyu-Neikban

Road in Laymyathna Township undertaken by Laymyathna Township Development Affairs Committee and opening of gravel road in Hinthada Township section on Aingthabyu-Neikban Road built by Hinthada Township DAC.

The road section of Aingthabyu-Neikban Road in Hinthada Township funded by Development Affairs Department and Hinthada Township

DAC is 13 miles long.

Consequently, locals from 75 villages of 8 village-tracts from Hinthada and Laymyathna Townships now have access to Laymyathna, Hinthada and Kyonpyaw any season and furthermore Pathein-Yangon Highway and Pathein-Monywa Highway become accessible via Ngathaingyoung and Yekyi.

# If you want to do politics

*Tin Min Kyaw*

A saying goes that those who are fighting a war know more about the evils of war. There is another which says that soldiers are the persons opposed to war most. These sayings may be truer for the Myanmar Tatmadaw that had driven out the colonialists, fought against the Fascists and warded off the internal armed strife. It has been for half a century since the Tatmadaw has been engaging in battles beginning from the time BIA was formed.

It is said that war is a follow-up of politics. Military means are sought when something cannot be solved through political means. Sometimes, there are political negotiations between the warring parties. The AFPFL government, the Caretaker government, the Revolutionary Council government and the Burma Socialist Programme Party government of Myanmar offered amnesty to armed groups and invited them to peace talks in 1958, 1963, 1974 and 1980. Only some factions of certain armed groups returned to the legal fold. No armed group made peace or returned to the fold as a whole.

**Only after the Tatmadaw government assumed State duties on 18 September 1988 a large number of national race armed groups returned to the legal fold and made peace. But peace came only after a lot of fierce battles. The Tatmadaw government took over the State duties unavoidably to restore the rule of law and peace and stability in Myanmar where anarchy ruled resulting from the 1988 disturbances.** At that time, the BCP and KNU raised their ugly heads again. The BCP drawing a conclusion that the Tatmadaw was weak during the time attacked Mongyan with a strong force on 23-9-1988. KNU launched an offensive

**When, in 1989, Kokang, Wa, Shan, Akha and Kachin tribes rose against BCP (Burma Communist Party), the entire people, including national brethren of armed groups in the jungle, heard the echo of peace.**

against Methawaw region beginning 26-9-1988. The Tatmadaw amidst difficulties warded off enemy offensives sacrificing lots of blood, sweat and lives.

The Tatmadaw government promulgated the political parties registration law on 27-9-1988 when the BCP was attacking Mongyan. But it seems that the BCP did not notice the enactment of the law as it was concentrating its efforts on the military attack. Actually, the law paved the way for armed groups to apply political means instead of military means. It was the best time for an armed group to abandon its armed struggle line and return to the legal fold if its original political motive was correct. But the BCP was in a cycle of political, ideological and theoretical mistakes.

Because of those mistakes, the BCP fell within six months. Kokang national race under the BCP command rose up against the BCP at Mongkoe on 12 March 1989 and seized the Kokang district office. In succession, Wa, Laungwaw, Lacheikwaw, Shan and Akha national race armed groups broke away from the BCP.

From the military point of view it was an excellent time to crush the BCP at different places

as the BCP forces were in factions existing in various locations after the weakening of the command. And that was the result of the loss of contact between the central and the lower levels. It is found that the Tatmadaw or the government gave priority to political and organizational outlook rather than to the military outlook in consideration of the nation's objective conditions and future.

**The Tatmadaw since its assumption of the State duties has pledged to realize the public-desired multiparty democracy system and also made assurances to reach this end. Actually, the Tatmadaw is a nation's institution that wants democracy most. It is the Tatmadaw that abolished the one party system the people disliked. It paved the way for the democracy sympathizers to establish political parties in conformity with the law. It was the best time for national race groups that broke away from the BCP and its domination policy to abandon their armed struggle line and to launch political activities within the legal framework. The Tatmadaw discarded the military option and applied political and organizational means to enable national race groups to do so. It held peace talks with armed groups in the jungles.**

From 31 March 1989 to 6 April 1997, 17 major armed groups and over 20 small armed groups returned to the legal fold and made peace and joined hands with the government.

Initial negotiations with the armed groups were based on the following terms:

1. Whether they can accept Our Three Main National Causes

*(See page 9)*

**The Tatmadaw is a nation's institution that wants democracy most. It is the Tatmadaw that abolished the single party system the people disliked. It paved the way for the democracy sympathizers to establish political parties in conformity with the law.**

# If you want to do politics

*Tin Min Kyaw*

(from page 8)

2. Whether they can abandon the armed struggle line and return to the fold in principle
3. Whether they can never get involved in or encourage drug trafficking and production.

The government continued to discuss with them the following main facts only if they accepted the above-mentioned terms.

1. To abide by the existing law
2. Not to participate or make contact with underground and aboveground anti-government organizations
3. To reside and be active only in the designated places
4. To discuss politics only at the National Convention
5. Although they are permitted to hold arms, they will have to discard their arms when the new constitution comes into force

Only after the above-mentioned conditions had been agreed upon, negotiations were made for allocation of areas for national race armed groups to settle, cooperation for regional development and setting the time when cease-fire would come into effect. When agreements had been finalized after discussions, an announcement was made to withdraw the declaration of national race armed groups as unlawful associations. Then, the government rendered financial assistance and other supplies to the armed groups and they began to cooperate with the government for regional development.

When, in 1989, Kokang, Wa, Shan, Akha and Kachin tribes rose against BCP (Burma Communist Party), the entire people, including national brethren of armed groups in the jungle, heard the echo of peace.

**The national people who had to bear the**

**All the peace groups are to take into serious consideration whether they should continue carrying arms at a time when they are going to have equal right to go into politics in the interests of their respective races and regions in accordance with the constitution.**

**brunt of internal insurgencies enthusiastically welcomed the peace overtures by the government and urged the armed groups to make peace with the government. Thanks to the efforts of peace envoys and local people's calls for peace, a large number of national race armed groups returned to the legal fold and made peace with the government.**

MTA headed by U Khun Sa, the strongest of 17 major armed groups that returned to the legal fold, surrendered unconditionally. Later, Palaung People's Liberation Army (PSLA) also exchanged arms for peace once and for all. As is known to all, some small armed groups followed suit.

It is for twenty years now that national race armed groups have given up the line of arms struggle and returned to the legal fold to build peace. In other words, they have become used to living within the framework of the law. It was natural that peace groups had the right to carry arms for the security of their community and region. However, now that the new constitution has been approved by the majority of people, they will have to abide by the provisions of the new constitution.

**Peace groups will have to honour the com-**

**mitments they made during the peace talks. They will be able to enjoy democratic rights the same as the entire people in accordance with the new constitution. They know well that they have enjoyed full security during the past twenty years. They should not run away with the idea that it is because they have the right to carry arms. They should bear in mind that national races in other regions live in peace and security although they do not carry arms. It is due to prevalence of peace and stability and security measures taken by the government.**

All the peace groups are to take into serious consideration whether they should continue carrying arms at a time when they are going to have equal right to go into politics in the interests of their respective races and regions in accordance with the constitution. As they have made up their mind from the very beginning to give up arms, there is nothing for them to fear. It is a welcome news that negotiations will be made to reconstitute KIO, which has returned to the legal fold, as a frontier force and that six Kachin national race leaders, including Vice-Chairman Dr Tuja, have been allowed to resign in order that they can form a political party and run in the 2010 election.

After KIO had returned to the legal fold, it held discussions with the Tatmadaw government in Myitkyina on 1 October, 1993. I remember that Vice-Chairman of KIO U Zaw Maing said during the discussions that they had already considered the fact that they would have to surrender arms when the constitution emerged out of the National Convention and they had to do so to engage in politics.

speech.

A total of 50 trainees are attending the course and it will last two weeks.—MNA

## 230 drug-related cases exposed in August

NAY PYI TAW, 16 Sept—A combined forces exposed 230 drug-related cases in August 2009. Seizures of the drug-related cases were 60.3716 kilos of opium in 44 cases, 63.8419 kilos of heroine in 65 cases, 0.8776 kilo of opium oil in 10 cases, 2.8365 kilos of low-grade opium in 10 cases, 7.7781 kilos of marijuana in 18 cases, 3261561 stimulant tablets in 61 cases, 27.666 kilos of opium speciosa in 12 cases, 0.18 kilo of stimulant powder in one case, 1031.32 kilos of caffeine in two cases, 10.0245 kilos of Ice in one case, 20 bottles of Buprinorphine in one case, 8000 tablets of Alprazolam in one case, three cases in failure and other one case. Action was taken against 355 persons – 298 men and 57 women – in cases.—MNA

## Farmers enjoying better life in Magway Township...

(from page 1)

When asked about their paddy farm, U Aung Shin told the Kyemon Daily, "In the early rainy season, we grow sesame and corn, especially corn for cow food. We can grow paddy this year due to Thaphanseik Dam."

Green paddy plants in the field were found swaying in the breeze. At that time, the whole village was busy with paddy farming.

The township PDC chairman explained that in the past the farmlands were not much successful because of lack of irrigation water; and due to Thaphanseik Dam, the

**U Thein Zaw, Member of southern Htonpauktaw Village Agricultural Organization Committee.**

fields were irrigated adequately and many farmers had turned to growing monsoon paddy; and that up to that time, Htonpauktaw Village had

grown 270 more acres of paddy.

We visited another paddy field belonging to member of southern Htonpauktaw Village Agricultural Coordination

**Farmers U Aung Shin and Daw Mya Kyin telling to the Kyemon Daily.**

Committee as well as farmer Ko Thein Zaw. He owns a four-acre field and grows paddy of Hsinthweyin strain for seed paddy.

In response to my question of the difference of agricultural farming between in the past and present, he with a smile said, "The only crop we could grow in the past was

corn for cow feed. It was impossible for us to grow corn in the years when we faced drought. But now, we can grow corn whether it does rain or not. And it doesn't matter at all if it is drought or not. We can grow corn and paddy on a large scale due to the supply of sufficient water from the river."

Then, we visited Thamandaw Village-tract made up of southern Thamandaw, northern Thamandaw and Badigone villages, and visited the paddy field of U Khaing Saw Oo. He said, "I have

**U Hla Shaung, Chairman of Magway Township Peace and Development Council.**

grown paddy in place of other crops for five years. The paddy strain I use is Manawthukha. Most of the years, I got good harvest of paddy, and on average I got about 110 baskets an acre."

He added, "Previously, crop yields were not very satisfactory, and on average an acre of farmland was priced at 400,000 to 500,000 kyats. Now, the farmlands have been changed into paddy fields, and so the price of an acre of paddy field has risen to 1.5 million to 2 million kyats.

The paddy sown acreage of Thamandaw Village-tract has increased by 680. He said that the village-tract sold paddy surplus; and that the village-tract had got two rice mills.

In Magway Township, Magway Division, 1436 acres of crops farmland have

become paddy fields. And so far, it has grown 950 acres of paddy.

For the convenience of farmers, the government not only supplies irrigation water but also sells chemical fertilizers on credit. In 2008, it sold 1964 tons of inorganic fertilizers in the monsoon paddy season and 190 tons in the summer paddy season. So, local farmers get on with their agricultural farming.

In olden days, Magway and surrounding areas were the areas where water was scarce. Unlike in the past, local farmers can transform from crop into paddy farming owing to adequate irrigation water and seed paddy supplied by the government. So, local farmers enjoy higher incomes and living standard.

**Congo gorillas killed for bush meat**

POINTE-NOIRE, 16 Sept—As many as 100 gorillas a year may be killed by poachers and sold for bush meat in a single region in the Republic of Congo, an environmental group says.

Endangered Species International said it conducted an undercover investigation in Kouilou, 60 to 80 miles up the Kouilou River from Pointe-Noire, the country's second-largest city and a major port.

If poaching continues at its current rate, gorillas could disappear from the region within a decade, the group's president, Pierre Fidenci, told the BBC.

Fidenci said the group's investigation began in the markets of Pointe-Noire, where observers spent a year examining what was on sale and talking to traders.

"Gorilla meat is sold pre-cut and smoked for about \$6 per 'hand-sized' piece," he said. "Actual gorilla hands are also available."—Internet

**Small electronic nose detects toxins**

CHAMPAIGN, 16 Sept—University of Illinois scientists say they are developing a postage stamp-sized electronic sensor that can detect and identify poisonous gases and toxins.

The development of the electronic "nose" is being supported by the National Institute of Environmental Health Sciences. The device can indicate which gas or toxin it has detected by changing colours.

Researchers, led by Professor Kenneth Suslick, said once fully developed, the sensor could be useful in detecting high exposures to toxic industrial chemicals that pose serious health risks in the workplace or through accidental exposure. The scientists say they hope to be able to market a wearable sensor within a few years.

**S Korea reports 8th A/H1N1 death case**

SEOUL, 16 Sept—South Korea on Tuesday reported its 8th death case related to A/H1N1 flu virus.

According to the Ministry of Health and Welfare, a 64-year-old woman from the northeastern province of Gangwon died earlier in the day, bringing the country's death toll from the new virus to eight.

The female patient was admitted to hospital on 27 Aug after showing high fever, chills and shortness of breath, and was initially diagnosed as pneumonia.

She was soon confirmed infected with the A/H1N1 flu virus. After receiving antiviral treatment, the patient was tested negative for the virus, but her health conditions kept deteriorating due to complications of pneumonia.—Xinhua

**TENDER INVITATION**

Myanmar Ceramic Industries, Ministry of Industry (1), is intended to establish a Cement Manufacturing Plant in Kyaukse Township, Mandalay Division, adopting the wet process Cement Manufacturing and capacity of 700 ton per day, using kiln firing system with kiln burner of Coal and gas dual firing system.

Seal Tenders are invited from Cement Machinery Manufacturing Companies with machinery and Full-Turnkey Basis including technical services, machinery supply, erection, commissioning and supervisory services. The details can be obtained from the following contact office.

Myanmar Ceramic Industries:  
Building No (41) Nay Pyi Taw  
Union of Myanmar  
Tel 067-408386, 408296  
Fax 067-408064  
Tender Closing Date- 31.12.2009

**Study links El Nino and 1918 flu pandemic**

COLLEGE STATION, 16 Sept—US researchers say they've linked the 1918-1919 El Nino with the high mortality of the influenza pandemic of 1918.

El Nino is the periodic warming of surface waters of the eastern Pacific Ocean that affects global weather systems. The El Nino of 1918-1919 — among the 20th century's strongest — coincided with the start of the influenza pandemic that scientists say infected more than half a billion people around the world, killing 25 million to 100 million individuals. That H1N1 pandemic, often called the Spanish Flu, is the same strain formerly called swine flu that is of concern today.

## Oxfam says 4 mln children under threat due to climate change

NAIROBI, 16 Sept— At least 4.5 million children could die unless world leaders deliver additional funds to help poor countries fight the growing impact of climate change, rather than diverting it from existing aid promises, Oxfam warned in a report released here on Wednesday.

The report titled Beyond Aid also warns that at least 75 million fewer children are likely to attend school and 8.6 million fewer people could

have access to HIV/AIDS treatment if aid is diverted to help poor countries tackle climate change.

Without at least 50 billion US dollars a year in addition to the 0.7 percent of national income rich countries have already pledged as aid, recent progress toward the Millennium Development Goals could stall and then go into reverse, Oxfam said. "Funds must be increased — not diverted — to help poor countries adapt to climate change

and this cannot be seen as a two for one deal by politicians. Rich countries must not steal money from poor hospitals and schools in order to pay their climate debt to the developing world," Oxfam International CEO Jeremy Hobbs said.

The warning comes as world leaders prepare to join President Barack Obama at his first UN address on climate change, at next week's Climate Summit in New York on 22 Sept.—Xinhua

Relatives of a man, part of a group of five men killed inside a car wash, react as soldiers and police officers guard the crime scene in Ciudad Juarez, Mexico, on 15 Sept, 2009. Ciudad Juarez, across from El Paso, Texas, is Mexico's deadliest city with more than 1,300 killings so far this year. The city is in the midst of an intense turf battle between the Juarez and Sinaloa cartels.—INTERNET

## New Zealand scientists give new hope to heart patients

WELLINGTON, 16 Sept— The New Zealand Auckland University scientists have made a breakthrough that could save the lives of thousands of heart patients worldwide and eventually offer an alternative to heart transplants. Scientists from the university's Bioengineering Institute, Department of Electrical and Computer Engineering and Department of Physiology have developed the technology to power a wireless heart pump, New Zealand Herald reported on Wednesday. Heart pumps keep sufferers of congenital heart failure alive as they await a donor heart. But current heart pump technology requires a wire cable to go through a patient's stomach and chest, which can cause serious infections or even death.

## Mental illness more common than thought

DURHAM, 16 Sept— The prevalence of anxiety, depression and substance dependency may be about twice as high as the mental health community has thought, US researchers say.

Duke University psychologists Terrie Moffitt and Avshalom Caspi and colleagues from the United Kingdom and New Zealand used data from a long-term study of more than 1,000 New Zealanders from birth to age 32. The researchers say people vastly underreport the amount of mental illness they've suffered when asked to recall their history years after the fact,

but self-reporting from memory is the basis of much of what is known about the prevalence of anxiety, depression, alcohol dependence and marijuana dependence.

Longitudinal studies like the study in New Zealand that track people over time are rare and expensive, Moffitt says.

"If you start with a group of children and follow them their whole lives, sooner or later almost everybody will experience one of these disorders," Moffitt, the Knut Schmitt-Nielsen professor of psychology and neuroscience at Duke University, said in a statement.—Internet

## Pain cream may prevent heart attack damage

CINCINNATI, 16 Sept— A common, over-the-counter pain cream rubbed on the skin during a heart attack may prevent or reduce heart damage, US researchers said. Keith Jones, a researcher in the department of pharmacology and cell biophysics at the University of Cincinnati, and scientists in his lab found applying capsaicin to specific skin locations in mice caused sensory nerves in the skin to trigger signals in the nervous system.

The study, published in the journal Circulation, found these signals activate cellular "pro-survival" pathways in the heart which protect the muscle.

Capsaicin, the main component of chili peppers that produces a hot sensation, is the active ingredient in several topical medications used for temporary pain relief. Jones said he is working with Dr Neal Weintraub, a University of Cincinnati cardiologist and other clinicians are constructing a plan to test capsaicin in a human population. "Topical capsaicin has no known serious adverse effects and could be easily applied in an ambulance or emergency room setting well in advance of coronary tissue death," Jones said in a statement.

"If proven effective in humans, this therapy has the potential to reduce injury and/or death in the event of a coronary blockage, thereby reducing the extent and consequences of heart attack."—Internet

## Hispanics less likely than whites to develop cancer

HOUSTON, 16 Sept— US Hispanics are less likely than other groups to develop cancer, but more likely to be diagnosed at a later stage of the disease, according to a report released on Tuesday.

Though cancer is the second leading cause of death among Hispanics, responsible for 20 percent of overall death in

Hispanics and 13 percent of death in Hispanic children, it causes less death among Hispanics than non-Hispanic whites, the report, compiled by the American Cancer Society, said.

Though the report found lower cancer incidence rates generally in Hispanics, it also found Hispanics have higher

rates of several cancers, including cancers of stomach, Cervix, liver, gallbladder and acute lymphocytic leukemia.

For many cancer types, Hispanics are far more likely than whites to be diagnosed in a later stage of the disease, when the cancer is likely to be less treatable, according to the report.—Xinhua

Ferguson's players with a laser.

After watching Paul Scholes head in a late winner against Turkish champions Besiktas, Ferguson confirmed that centreback Jonny Evans had been among United players targeted.

"It was in the first half, although thank fully the police did something about it," Ferguson said. "They managed to get the culprit, which is good because I noticed it particularly on Jonny Evans. It seemed to be on him all the time."

Internet

## Real Madrid flatters to deceive in Zurich triumph

MADRID, 16 Sept—Real Madrid had to survive a second half fight back from Swiss side Zurich before claiming all three points in the opening game of the Champions League group stage.

Cristiano Ronaldo scored two free kicks, while Raul, Gonzalo Higuain and Guti added further goals in the Spanish side's 5-2 away win.

However, Real Madrid struggling to holding on to a 3-2 lead before Ronaldo and Guti scored late goals to give the final result a healthier look. After the weekend's 3-0 win away to Espanyol, coach Manuel Pellegrino brought Ronaldo back into the starting 11 along with central defender Pepe.—XINHUA

## Cypriot debutants APOEL hold Atletico

MADRID, 16 Sept—Atletico Madrid were held to a goalless draw in their opening Champions League group game against Cypriot debutants APOEL here on Tuesday.

Atletico owed their presence in the last 32 for the second year running to a 5-2 aggregate defeat of Greek side Panathinaikos in the play-offs, while APOEL put themselves on the European map by beating Copenhagen 3-2 over two legs. Atletico coach Abel Resino started Diego Forlan and Sergio Aguiro up front while his opposite number, Serbian Ivan Jovanovic, was missing forward Nenad Miroslavljivic but welcomed back defender Altin Haxhi from suspension.

The visitors from Nicosia had the first chance of the match in the seventh minute from Maroin Zewlakow but it was virtually all one way traffic after that as Atletico dominated in attack without succeeding in breaking down APOEL's defence.

## Petrova advances at Quebec tennis

QUEBEC CITY, 16 Sept—Nadia Petrova, who was coming off a shocking fourth-round loss to Melanie Oudin at the US Open, cruised to a 6-2, 6-0 win over Carly Gullickson in the first round of the WTA Bell Challenge.

Defending champ and top seed Petrova of Russia needed just 51 minutes to dispatch Gullickson at the 220,000 dollar indoor tournament on Tuesday.

Third seeded Aleksandra Wozniak also opened on a successful note by beating Corinna Dentoni by the same 6-2, 6-0 margin at the Laval University courts.

Last year's runner-up Bethanie Mattek-Sands defeated seventh-seeded Varvara Lepchenko 6-4, 7-5.—Internet

## Anelotti happy for Chelsea to win ugly

LONDON, 16 Sept—Carlo Ancelotti insists he is happy for Chelsea to win ugly as the Blues manager bids to lead his side to Champions League glory.

Ancelotti's team spluttered to an unconvincing 1-0 victory over Porto on their return to European action at Stamford Bridge on Tuesday.

Nicolas Anelka's superb finish early in the second-half was enough to clinch the points, but the Portuguese champions left west London rueing their failure to turn waves of pressure in the closing stages into an equaliser.

Internet

## Super-Pippo at the double to punish spirited Marseille

MARSEILLE, 16 Sept—AC Milan left their mediocre form in Italy's Serie A well behind them to beat Marseille 2-1 at the Stade Velodrome and strike a first blow in their Champions League group C on Tuesday.

Milan striker Filippo Inzaghi proved a thorn in the side of Didier Deschamps' side on a wet and rainy night in Marseille scoring a goal in either half of an entertaining match and coming close on

several other occasions.

Marseille scored early in the second half through Argentine defender Gabriel Heinze but despite plenty of pressure from the hosts Leonardo's visitors held on to claim their first ever victory in Europe over the team that beat them 1-0 to win the trophy in 1993.

## Federer has one more rival for top spot

NEW YORK, 16 Sept—World number one Roger Federer began the US Open fortnight with a new top rival for his tennis throne in Andy Murray and ended the year's last Grand Slam with yet another formidable challenger.

Juan Martin Del Potro joined the No. 1 conversation with a shocking 3-6, 7-6 (7/5), 4-6, 7-6 (7/4), 6-2 victory over the Swiss star in Monday's US Open final, the 1.98 metre Argentine giant snapping Federer's five-year title run.

Internet

## Bordeaux hold Juventus to Turin stalemate

TURIN, 16 Sept—French champions Bordeaux earned a deserved point in a 1-1 draw at Italian giants Juventus in Champions League Group A here on Tuesday.

Vincenzo Iaquinta gave the hosts the lead soon after the hour mark but Jaroslav Plasil equalised a quarter of an hour from the end for Laurent Blanc's team.

It was not the start Juventus had expected but will give Bordeaux confidence they can qualify from a group that also contains Bayern Munich and FC Zurich.—Internet

## Prehistoric fish found again in Indonesia

JAKARTA, 16 Sept— A research team from Indonesia's Sam Ratulangi University, Indonesian Science Institution and Fukushima Aquamarine Japan on Monday once again found prehistoric fish called coelacanth at Talise waters of North Minahasa in 155 meter-depth. The fish was found during the first hour of the researchers' first day by a remotely operated vehicle (ROV). "The finding is very surprising. The fish was found live and free swimming in its habitat," said Prof Alex Masengi, the Sam Ratulangi University's dean of fishery and marine science faculty.

On June 27, 2007, the same team found a coelacanth fish at Malalayang waters of North Sulawesi's Manado Bay in 190 meter-depth. The second finding location in Talise is about 120 kilometer north of the first one. The coelacanth fishes' habitat is in depth of more than 180 meter with maximum temperature of 18 celcius degree inside underwater volcanic concaves.

The fishes only live in western South Africa waters and eastern Indonesian waters, called Latimeria chalumnae and Latimeria menadoensis, respectively.—Xinhua

A baby girl was born Monday on a high-speed train linking Paris and Brussels, the first such case since the Thalys rail service was created in 1996, the company said Monday.—INTERNET

### Weather Map of Myanmar and Neighbouring Areas

## WEATHER

### Wednesday, 16<sup>th</sup> September, 2009

**Summary of observations recorded at 09:30 hr MST:** During the past 24 hours, rain or thundershowers have been isolated in Magway Division, scattered in Shan State, upper Sagaing and Mandalay Divisions, fairly widespread in Chin and Rakhine States, lower Sagaing, Bago and Yangon Divisions and widespread in the remaining areas with locally heavyfall in Mon State. The noteworthy amounts of rainfall recorded were Belin (6.61) inches, Thaton (3.19) inches, Paung (2.95) inches, Palatwa (2.60) inches, Bago (2.52) inches, Hpa-an (2.40) inches, Kyaukpadaung (0.93) inch and Chauk (0.12) inch.

Maximum temperature on 15-9-2009 was 94°F. Minimum temperature on 16-9-2009 was 72°F. Relative humidity at (09:30) hours MST on 16-9-2009 was 93 %. Total sun shine hours on 15-9-2009 was (3.0) hours approx.

Rainfall on 16-9-2009 was (0.04) inch at Mingaladon, Tr at Kaba-Aye and Nil at Central Yangon. Total rainfall since 1-1-2009 was (94.65) inches at Mingaladon, (104.84) inches at Kaba-Aye and (111.22) inches at Central Yangon. Maximum wind speed at Yangon (Kaba-Aye) was (4) mph from Southwest at (16:30) hours MST on 15-9-2009.

**Bay inference:** Monsoon is weak in the Andaman Sea and Bay of Bengal.

**Forecast valid until evening of 17<sup>th</sup> September 2009:** Rain or thundershowers will be widespread in Kachin, Chin, Shan and Mon States, upper Sagaing and Taninthayi Divisions, fairly widespread in Kayin and Rakhine States, Bago, Yangon and Ayeyawady Divisions and scattered in the remaining areas. Degree of certainty is (80%).

**State of the sea:** Seas will be slight to moderate in Myanmar waters.

**Outlook for subsequent two days:** Increase of thundery conditions in the Central Myanmar areas.

**Forecast for Nay Pyi Taw and neighbouring area for 17-9-2009:** Isolated rain or thundershowers. Degree of certainty is (80%).

**Forecast for Yangon and neighbouring area for 17-9-2009:** Isolated rain or thundershowers. Degree of certainty is (80%).

**Forecast for Mandalay and neighbouring area for 17-9-2009:** Likelihood of isolated rain or thundershowers. Degree of certainty is (60%).

#### Perennial energy crops could be good for carbon savings and for wildlife

SCIENCE DAILY, 16 Sept—Growing the energy crops short rotation coppice (SRC) willow and miscanthus grass could help the UK to reduce carbon emissions and benefit wildlife, according to researchers from the UK Research Councils' Rural Economy and Land Use Programme.

Dr Angela Karp at Rothamsted Research led an interdisciplinary team from the universities of

East Anglia and Exeter, the Game and Wildlife Conservation Trust and the Centre for Ecology and Hydrology, in a major research project to identify the effects of increasing

the amount of land used to grow these new crops. Their calculations suggest that planting biomass crops to generate electricity does lead to net savings in greenhouse gases, compared with current emissions.—*Internet*

Fields of miscanthus in the English landscape.

#### Beans' defenses mean bacteria get evolutionary helping hand

SCIENCE DAILY, 16 Sept—Bean plants' natural defences

against bacterial infections could be unwittingly driving the evolu-

tion of more highly pathogenic bacteria, according to new research published September 10 in *Current Biology*.

The study sheds new light on how bacterial pathogens evolve and adapt to stresses from host plants. This information could help researchers develop new ways of tackling pathogens that cause extensive and costly damage to beans and other food crops.

*Internet*

*Bean plants' natural defences against bacterial infections could be unwittingly driving the evolution of more highly pathogenic bacteria.*

#### Health Ministry raising awareness on prevention and control of New Influenza A(H1N1)

NAY PYI TAW, 16 Sept—The Ministry of Health is speeding up the preventive and control measures against pandemic New Influenza A(H1N1) as of 28 April. Up to now, a total of 41 infected patients have been found and no person has died in the infection of virus. Of them, 33 patients were discharged from the hospital because of recovery from their illness. The remaining eight patients are undergoing treatment and they are in good health.

With a view to preventing the infection of the virus among the people, the Ministry of Health called for strictly abiding by the warnings on New Influenza A(H1N1) and actively taking part in the preventive measures and control of the disease.—*MNA*

#### Htarwara teleplay to be on air on 18 September

YANGON, 16 Sept—A teleplay entitled "Htarwara" starring Academy Min Maw Gun, Nine Nine, Nay Toe, Myint Myat, Academy Eindra Kyaw Zin, Thazin, Moe Hay Ko, May Thet Khine and others artistes directed by Director Mee Pwar will be aired after 6 pm and 8 pm local news programme on Myanma Radio and Television and Myawady TV on 18 September (Friday).

*MNA*

#### Weather forecast on (17-9-2009)

Nay Pyi Taw and neighbouring areas:  
Isolated rain or thundershowers. Degree of certainty is 80%.

Yangon and neighbouring areas:  
Isolated rain or thundershowers. Degree of certainty is 80%.

Mandalay and neighbouring areas:  
Likelihood of isolated rain or thundershowers. Degree of certainty is 60%.

#### Noteworthy amounts of rainfall (16-9-2009)

Bilin	6.61 inches
Thaton	3.19 inches
Paung	2.95 inches
Paletwa	2.60 inches
Bago	2.52 inches
Hpa-an	2.40 inches
