Chairman, Secretary elected for State Central Working Committee of the Sangha

YANGON, 18 July— The Special Meeting of the Sixth State Central Working Committee of the Sangha was held at Maha Pasana Cave on Kaba Aye Hill in Mayangon Township this afternoon.

Members of the Sangha elected seven Ovadaçariya Sayadaws of the meeting. Vice-Chairman of State Sangha Maha Nayaka Committee Agga Maha Pandita Agga Maha Saddhamma Jotikadhaja Sayadaw Bhaddanta Gunesana presided over the meeting together with MC Joint-Secretary Agga Maha Pandita Sayadaw Bhaddanta Manitasiribhivamsa.

The Meeting Chairman Sayadaw gave Sammodaniya Saraniya Ovadaçakatha.

Minister for Religious Affairs Thura U Myint Maung supplicated on the religious affairs.

The Supervisory Committee for Organizing the Substitute Election was formed with Chairman Shwewawin Monastery Sayadaw State Ovadaçariya Abhidgaja Maha Rattha Guru Abhidhaja Maha Saddhammajotika Sayadaw Bhaddanta Sasanabhivamsa of Myataung Taik of Mahaungmye Township and Secretary Maha Withutayama Taik Sayadaw State Ovadaçariya Agga Maha Pandita Agga Maha Saddhamma Jotikadhaja Sayadaw Bhaddanta Viçara of Pakokku of Magway Division.

(See page 7)

Four political objectives

- * Stability of the State, community peace and tranquillity, prevalence of law and order
- * National reconsolidation
- * Emergence of a new enduring State Constitution
- * Building of a new modern developed nation in accord with the new State Constitution

Four economic objectives

- * Development of agriculture as the base and all-round development of other sectors of the economy as well
- * Proper evolution of the market-oriented economic system
- * Development of the economy inviting participation in terms of technical know-how and investments from sources inside the country and abroad
- * The initiative to shape the national economy must be kept in the hands of the State and the national peoples

Four social objectives

- * Uplift of the morale and morality of the entire nation
- * Uplift of national prestige and integrity and preservation and safeguarding of cultural heritage and national character
- * Uplift of dynamism of patriotic spirit
- * Uplift of health, fitness and education standards of the entire nation

Leinli: highest suspension bridge on Nay Pyi Taw Pyinmana-Pinlaung motor road

Article: *Kayan Soe Myint*; Photos: *Moe Myint Hlaing*

Myanmar engineers of Public Works building Leinli Suspension Bridge which will be the highest of its kind in Myanmar.

The State Peace and Development Council is placing special emphasis on creation of better transport. In accord with the guidance of the Head of State, the Ministry of Construction is building roads and bridges one after another in leaps and bounds as part of efforts to enhance social and economic sectors of the State. So far, the ministry has built 2915 bridges with the length between 100 feet and 180 feet and 240 large bridges of over 180 feet long from 1988 to date, and a total of 22 bridges are under construction.

We have learnt that Public Works under the Ministry of Construction is building five bridges

across Ayeyawady River and Leinli Suspension Bridge at the mile post 42/6 on Nay Pyi Taw Pyinmana-Pinlaung Motor Road. To cover the news on progress of construction works, in the first week of July 2010, I made a trip to the suspension bridge by car along Nay Pyi Taw Pyinmana-Pinlaung Motor Road under the arrangements of Road Construction Special Group (13).

Nay Pyi Taw Pyinmana-Pinlaung Motor Road is being upgraded to an 18 feet wide facility. As the road section (Kantha-Koegway) has been inaugurated recently, I witnessed fruitful results of better transport for the local people along the road.

The aims of the State Peace and Development Council in building roads and bridges by spending a large sum of money are to enable the Union of Myanmar to keep abreast of global countries and to ensure equitable development of all the regions in the Union. The following is the list of completed bridges of over 180 feet long, the list of bridges under construction and the plan to build more bridges in States and Divisions.

Intellectuals, intelligentsia on the increase

As development of human resources is essential for national development, the government is generating better access to education by opening new basic education schools, universities and colleges the length and breadth of the nation to bring about more and more educated people.

As part of the lofty drive, the government is expediting school enrolment week activities across the nation in the run-up to the school season in order that every school-age child can attend classes. Simultaneously, it is constantly taking measures to ensure that schoolchildren complete education, to reduce dropout rates, and to sharpen the abilities of students.

In a bid to improve access to education, the University for Development of National Races and the Nationality Youths Development Degree College were established with a view to producing intellectuals and intelligentsia throughout the nation including in border areas.

Moreover, a good number of vocational training centres for women have been opened in border areas to improve the living conditions for women.

Now, endeavours are being exerted on a self-reliant basis to build a peaceful, modern and developed nation. To provide impetus for the plan, new generation youths are nurtured and trained to enable the motherland to catch up with global partners through the might of a growing number of intellectuals and intelligentsia.

Today, emergence of new roads, bridges, factories and dams all over the Union is the result of the development of human resources brought up by the State.

National people are therefore to do their bit as well as to work hand in hand with the government to achieve the goal of building a peaceful, modern and developed nation.

Workshops on biodiversity, deforestation held

NAY PYI TAW, 18 July—The Myanmar Strategy and International Studies Department under the Ministry of Foreign Affairs and Friedrich Ebert Stiftung co-organized workshop on biodiversity and deforestation issues and solutions on 15 July and workshop on management skills, leadership and teamwork on 16 July at the Sedona Hotel in Yangon.

Myanmar, India, South East Asia and Europe submitted 12 papers at the first workshop, and Myanmar submitted one paper and an expert from Bangkok, one paper at the later workshop.

The workshops were attended by officials and representatives from ministries, UNDP and special agencies, EU, and governmental and non-governmental organizations on environmental conservation and forestry.—MNA

Child killed, Al-Qaeda leader captured in Iraq's Diyala

BAQUBA, 18 July—A child was killed in Iraq's eastern Province of Diyala on Saturday, while the Iraqi security forces captured an al-Qaeda leader responsible for dozens of attacks and killings against Iraqis, a provincial police source said.

Unknown gunmen shot dead a child in the town of al-Maqqadiyah, some 100 km northeast of Baghdad, the source told *Xinhua* on condition of anonymity. Iraqi security forces sealed off the scene and captured four suspects as part of investigation to discover the motive behind such a crime, the source said.

Two killed, 11 escape in brazen Afghan jailbreak

KABUL, 18 July—A guard and a prisoner were killed and 11 inmates escaped early Sunday after explosives were smuggled in and detonated at a prison in western Afghanistan.

The blast went off shortly after 2 am, destroying a gate that allowed 19 prisoners to escape, Farah province's deputy governor Yonus Rasouli said. One prisoner died and three were wounded in an ensuing gunbattle with guards. Eight inmates were recaptured.

Gen Abdul Makhtar, deputy for Afghanistan's prison department, said one seriously wounded guard later died.—*Xinhua*

Blast in Taliban birthplace kills three including two police

KANDAHAR, 18 July—A powerful blast rocked Taliban birthplace Kandahar in south Afghanistan Sunday morning, killing three persons and injuring two others, police said.

"The blast occurred in Khawja area of Kandahar city at 08:30 am local time as a result two police and a civilian were martyred," provincial police chief Sardar Mohammad Zazai told *Xinhua*.

One police and one civilian sustained injury in the blast, he further said.

Meantime, a doctor in Mir Wais hospital in Kandahar city, the capital of Kandahar Province confirmed that so far two dead bodies including one police have been taken to the hospital.

Robotic legs allow paraplegics to walk

This undated handout picture released by Rex Bionics shows Hayden Allen using bionic legs called Rex in Wellington, New Zealand. INTERNET

WELLINGTON, 18 July—Two British engineers living in New Zealand have developed a pair of robotic legs they say will allow paraplegics to walk again.

Dubbed Rex, for Robotic Exoskeleton, the prostheses took engineers Richard Little and Robert Irving seven years to design and build, *The Daily Telegraph* reported Friday.

The legs weigh 84 pounds and are activated by a small electric motor powered from a lightweight battery.

Wheelchair users can move into the device in a sitting position, strap themselves in, and control movements with a joystick and control panel on the arm, the newspaper said.

Hayden Allen, unable to walk since a motorcycle accident injured his spine, was one of the first to walk using Rex.—Internet

New virus targets industrial secrets

NEW YORK, 18 July—Siemens is warning customers of a new and highly sophisticated virus that targets the computers used to manage large-scale industrial control systems used by manufacturing and utility companies.

Siemens learned about the issue on July 14, Siemens Industry spokesman Michael Krampe said in an e-mail message Friday. "The company immediately assembled a team of experts to evaluate the situation. Siemens is taking all precautions to alert its customers to the potential risks of this virus," he said.

Security experts believe the virus appears to be the kind of threat they have worried about for years—malicious software designed to infiltrate the systems used to run factories and parts of the critical infrastructure.

Chinese patients being denied surgeries due to lack of transplant organs

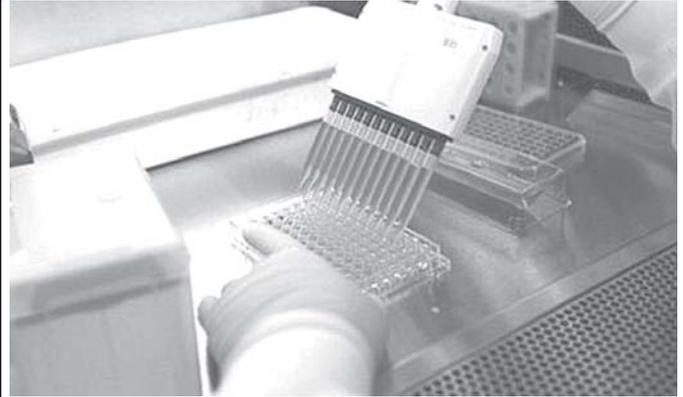

TIANJIN, 18 July— Only one percent of Chinese patients in need of certain transplant surgeries receive donated organs, according to a statement issued at a press conference on Saturday in Tianjin.

The press conference was hosted as part of the fourth athletic games for people having gone through transplant surgeries, which runs from Friday to Sunday in Tianjin.

The Games, sponsored by the Chinese Medical Association, are organized to boost the confidence of recovered transplant patients and to call upon more people to become organ donors, noted medical officials. According to a statement issued at the press conference, China has about 1 million people in need of kidney transplant surgery and 300,000 patients seeking liver transplants each year, but only one percent of them have such surgeries due to the lack of donated organs.

The Red Cross Society of China is responsible for overseeing organ donations and the distribution of these organs.

According to officials, by the end of June 2009, 67,800 people had registered with the Red Cross Society to become organ donors, including 25,100 offering their corneas for transplants following their deaths.—Internet

US envoy says peacemaking in Mideast difficult

RAMALLAH, 18 July — US special envoy to the Middle East George Mitchell, who is mediating between Israel and the Palestinians, said on Saturday making peace in the Middle East is difficult.

"We recognize the difficulties and the complexities involved in trying to realize this mission, but we are determined to continue our efforts," said Mitchell after meeting with Palestinian President

Mahmoud Abbas in Ramallah.

Mitchell is leading indirect negotiations between the two sides, hoping to get them to agree on issues related to the borders of the future Palestinian statehood and security in the region by September.

But Mitchell and the US administration are eager to let the two sides move to face-to-face negotiations even before the four-month ultimatum of the

proximity talks. Mitchell described his meeting with Abbas, who refuses to jump to the direct talks before progress is made during the proximity talks, as "very candid and productive."

"We look forward to continuing that discussions in the near future in an effort to realize the vision that President (Barak) Obama set for us of comprehensive peace in the Middle East," Mitchell said.

Myanmar Thabin Asiayon pays respects to older scholars

YANGON, 18 July—The fourth respect paying ceremony organized by Myanmar Thabin Asiayon was held at the National Theatre on Myoma Kyaung Street,

here, this morning.

Chairman of the Asiayon (Central) U Sein Mar Din explained the purpose of holding the ceremony.

Chairman U Sein Mar

Din, Vice-Chairman U Ye Dway and Secretary U Aung Tin Win accepted cash donations from wellwishers and presented certificates of honour to them.

Members of the Asiayon paid respects to older Thabin scholars. On their behalf Yama U Ohn Maung gave a

speech. At the ceremony, K 50,000 each was presented to 122 older persons of the theatrical drama world.

“Myanmar engineers are taking all responsibilities for construction of Leinli Suspension Bridge, and I am closely supervising construction for timely completion of bridge construction.”
Chief Engineer U Than Swe.

(from page 8)

With the use of dwelling bucket, jumper, tri-coat and auger, they could overcome the difficulty. After that, they continued their works with the use of dwelling side cap, he said.

He further explained

that in building the tower of the upper structure, they had difficulty in installation of the construction materials because the tower was of hollow type. Construction of T-2 tower was also difficult because it was a 140 feet high hollow type tower.

In the rainy season, the workers dutifully carried out their tasks at risk of their lives.

Another interview was made with Chief Engineer U Than Swe of Public Works under the Ministry of Construction who was supervising the construction site.

Chief Engineer U Than Swe said that taking responsibility of Chief Engineer, he is closely supervising the construction Leinli Suspension Bridge. He makes arrangements for availability of construction materials and heavy machinery from the Head Office of Public Works.

The design of the bridge was created by the People’s Republic of China. Hence, the Head Office of Public Works signed an agreement to order OBM Company of China for purchase of steel trusses and other types of frames to be installed at the upper structure of the bridge.

The construction materials have been arrived at the construction site, and Chinese technicians also arrived at the site to install the upper structure of the bridge applying modern technology. He said that he is supervising the construction task between Myanmar engineers and Chinese technicians, he added.

He explained that Myanmar engineers poured out concerted efforts for construction of the whole bridge. He expressed his belief that as Myanmar engineers have

much experience on construction of many bridges, they will overcome the difficulties of building the suspension bridge.

Leinli Suspension Bridge on Nay Pyi Taw Pyinmana-Pinlaung Asphalt Road will be a drive to create closer relations between the national races of hilly regions from Pinlaung-Tonghon, Shwenyaung, Taunggyi and Loikaw of Kayah State and those of the plain regions in Nay Pyi Taw Pyinmana and Nay Pyi Taw Tatkon in the near future.

BP prolongs test on oil well in Mexico Gulf

The new containment capping stack on the blown-out oil well in the Gulf of Mexico is seen during the well integrity test in this video grab from the BP's live feed on 17 July, 2010.

XINHUA

BEIJING, 18 July— British energy giant BP Plc decided to extend for another day of an integrity test of its leaking Gulf of Mexico well which has

been under control by a new containment cap, according to Reuters reports on Sunday.

BP cut off the oil spill on Thursday with a new, tight-fitting containment cap installed atop the well a mile under the ocean surface.

The massive oil spill, triggered by the 20 April offshore rig explosion that killed 11 workers, has caused an economic and environmental disaster along the US Gulf Coast.

"As we continue to see success in the temporary halt of oil from the leak, the US government and BP have agreed to allow the well integrity test to continue another 24 hours," retired Coast Guard Admiral Thad Allen, the US government's point man on the spill, said in a statement.—Xinhua

Robotic surgery makes Dr Giulianotti think about art

CHICAGO, 18 July— Dr Pier Cristoforo Giulianotti has completed more than 1,000 successful major procedures without laying a finger on a patient. Using hand controllers, foot pedals, and 3-D visualization, he performs complex surgeries sitting just a few metres away from the operating table.

It happens that the sophisticated surgical system, consisting of three to four robotic arms and a remote console, is nicknamed after one of the Italian surgeon's most famous hometown visionaries — Leonardo da Vinci.

"At the beginning, even I did not understand the revolution behind robotics because I was appreciating only the aspects of mechanical improvements," said Dr Giulianotti, chief of the Division of General, Minimally Invasive and Robotic Surgery at the University of Illinois-Chicago. "But actually, in robotics there is a charming revolution I can summarize paradoxically: You are modifying reality using virtuality. You are using a virtual environment to interact with reality; the only limit is your mind." As the president of the Clinical Robotic Surgery Association, an organization of robotic surgeons worldwide formed last year, 57-year-old Dr Giulianotti is leading the reimagining of surgical operations.

Swiss exporters warn of job losses on franc rise

ZURICH, 18 July—The strengthening Swiss franc is starting to take its toll on exporters, who warn that the appreciation of the currency is eating into their earnings margin and threatening thousands of jobs.

"Until the 1.40 (franc against the euro) barrier, the consequences were not too serious. But now it is really starting to hurt," said Rudolf Minsch, chief economist of an umbrella group of companies economiesuisse.

Hit by the eurozone's debt crisis woes, the euro sank to lows against the Swiss franc, with a euro trading between 1.30 and 1.35 francs. A year ago, one euro fetched more than 1.50 francs.

The Swiss currency was also punished for the country's strong economic fundamentals, as its reputation as a refuge was enhanced during the economic crisis and now the eurozone woes.

Economists said the trend is far from ending.

"It is possible that the Swiss franc will gain further and that it could reach 1.32 (against the euro) by the end of three months," said Marcus Hettinger, who heads forex trade at Credit Suisse.

He added that the euro could even dip below the 1.30 franc mark.

Pictet analysts have also said the the franc could strengthen to "levels never seen against the euro and maybe also against the dollar."

Against this trend, Swiss companies that owe part of their competitiveness to a weak franc now find themselves in a difficult position.

Bus falls off cliff in southwest China, killing 23

BEIJING, 18 July—State media says a bus has fallen off a cliff in southwestern China, killing 23 people on board. The official Xinhua News agency says the bus was travelling from Ma'erkang County in Sichuan Province to the provincial capital of Chengdu when it plummeted off a mountain road Sunday morning. Xinhua says the accident happened on a road that was undergoing repairs in Danba county in Ganzi Tibetan Autonomous Prefecture. No other details were immediately available.—Xinhua

Bus drops off cliff in Albania, killing more than 10 people

TIRANA, 18 July—Fourteen died and 16 others were injured on Saturday when a bus plunged into a ravine in northern Albania.

Albanian authorities said that the bus carried 35 passengers on board. It was travelling from capital Tirana to Fushe Arrez, 70 kilometres north of Tirana, when it veered off the mountain road and dropped into a river 300 metres below at about 5 pm local time.

Police said a sudden downpour was the cause of the accident.

The injured were brought by helicopters to hospitals in Tirana and the northern city of Shkodra.

Cambodia hosts large-scale peacekeeping drill

KAMPONG SPEU, 18 July— Cambodia opened its first ever large-scale international peacekeeping training exercise with a ceremony Saturday at a military base south of the capital.

Over 700 military personnel from 23 countries will participate in two weeks of field training during the “Angkor Sentinel” exercise, focusing on developing nations’ contributions to UN peacekeeping operations.

“From a country that used to receive blue hat soldiers to help keep peace, Cambodia has become a country that sends blue hat soldiers to help keep peace in other nations,” Cambodian Prime Minister Hun Sen said, referring to UN troop uniforms.

Cambodia was the focus of a UN peacekeeping mission in the early 1990s to help end decades of civil war, but has recently deployed troops to work as UN peacekeepers in Chad, Sudan and the Central African Republic.

Gulf coast fishermen angry over oil claims ruling

BILOXI, 18 July— Fishermen in Mississippi say they are angry that under the terms of BP’s \$20 billion oil spill fund, money they earn doing clean-up will be subtracted from their claim against the company.

The fishermen reacted after Kenneth Feinberg, the federal official in charge of administering the compensation fund, announced the decision at a town hall meeting in Biloxi on Friday. Some walked out of the meeting in protest, arguing it was pointless to work under the Vessels of Opportunity programme, set up by BP to help clean up the damage from the deepwater leak that started in April. Oil stopped

flowing from the leak on Thursday.

“I am furious about this,” said Tuget Nguyen, who works with family members as a fisherman in Pass Christian, Mississippi.

“If he takes away the money we are making from BP when we get our claims, then nobody is going to work for BP to clean up this oil and we will not rent our boats to BP either.—Internet

Tail end of Typhoon Conson hits Vietnam; eight missing

HANOI, 18 July— Eight people were missing in Vietnam on Sunday as the tail end of Typhoon Conson blew ashore after battering the Philippines and China and killing dozens.

The storm made landfall on Vietnam’s northern coast Saturday night. Six fishermen remained missing after their boat sank as they

sought shelter at the Paracel islands off Vietnam’s central coast, said disaster official Pham Thi Kim Tuyen in central Quang Ngai Province.

Tuyen said naval ships and fishing boats were searching for those missing. Before making its way to Vietnam as a tropical storm, the typhoon slammed the

Philippines and China last week.

The bodies of three missing Filipino fishermen were recovered, raising the country’s death toll to 68 with 84 missing, the Philippines’ National Disaster Coordinating Council reported on Sunday. Conson then grazed China, killing two there.

Five reasons knee replacements can fail

NEW YORK, 18 July— Most knee replacements work well for years, but a US surgeon says sometimes they can fail due to friction, infection, instability, fracture or stiffness.

Dr Amar Ranawat, a hip and knee specialist in the adult reconstruction and joint replacement division of the Hospital for Special Surgery in New York City, says knee replacements normally perform well for at least 15-20 years in more than 95 percent of patients.

However, there are times when replacements fail and patients will need a corrective procedure known as revision total knee replacement. Friction — joint surfaces rubbing against each — Ranawat says, can result in bone loss and loosening of the implants.

Venezuela opens Bolivar's tomb to examine remains

CARACAS, 18 July—Hugo Chavez has opened the coffin of his idol Simon Bolivar as Venezuela investigates the president's suspicions of foul play in the South American independence hero's death nearly two centuries ago.

Chavez announced the exhumation of Bolivar's remains on Friday and displayed the intact skeleton briefly on national television, saying he wept when he saw the bones of the inspiration for his Bolivarian Revolution.

While historians have generally concluded that Bolivar died of tuberculosis in 1830, Chavez has another theory — that Bolivar was murdered — even though he acknowledges it may not be possible to prove.

Lab mice are sensitive to their cages

BOULDER, 18 July— The brains of mice in research labs are affected by the cages they're kept in, researchers say, which could skew the results of experiments.

Mice are the main research mammals worldwide and promising breakthroughs in the fields of cancer, genetics and neuroscience depend on tests in which they are used, ScienceDaily.com reported Friday.

"We assume that mice used in laboratories are all the same, but they are not," Diego Restrepo, director of the Neuroscience Programme at the University of Colorado, said. "When you change the cages you change the brains and that

affects the outcomes of research."

Researchers rely on careful comparison of experimental results from different lab experiments to confirm discoveries, but some of these comparisons may not be trustworthy, Restrepo said. The brains of mice are extremely sensitive to environments and can physically change when moved from a cage or enclosure where air circulates freely to one where it doesn't, he said. That can affect the accuracy of research, so two labs doing the same experiments may get totally different results and never know why, he said.

Republicans square off in Arizona Senate debate

PHOENIX, 18 July— Former US Rep JD Hayworth had a much-needed opportunity Friday night to refocus Arizona's Republican Senate primary on incumbent John McCain, and he came out swinging. McCain, Hayworth and political newcomer Jim Deakin squared off Friday in the first of two televised debates before Arizona's 24 Aug. Republican primary.

"It's really sad to see John McCain, who should be revered as a statesman, basically reduced to a political shape-shifter," he said, then turned to his opponent. "John, you've changed positions so much in this campaign maybe we'll have to set up an extra podium for you depending on which John McCain is going to answer which

question." And so it was for an hour as Hayworth lobbed a number of one-liners toward Arizona's senior senator, who has a

comfortable advantage in fundraising and polling less than two weeks before early voting begins.

Ross Dress for Less opens in downtown San Jose

SAN JOSE, 18 July—The first department store to open in downtown San Jose in decades sells name-brand merchandise at cut-rate prices. And that was just fine for dozens of eager shoppers lined up with their purchases on Friday morning inside the new Ross Dress for Less store.

From most accounts, they'll be back. "I'll be here once or twice a week, at least," said downtown office worker Irene Cortez, whose shopping cart by midmorning already was piled with back-to-school clothes for her children and kitchen goods for her.—Internet

Police detains 40 after Iran bombing

TEHRAN, 18 July — Iranian police arrested 40 suspects as funerals were underway for the victims of a devastating twin bombings outside a mosque in the southeastern city of Zahedan, local media reported on Saturday.

Gens Ahmad Reza Radan, Iran's deputy police chief, told the semi-official Fars agency that the suspects "intended to

Iran blames US for deadly mosque bombing.—INTERNET

create militancy in Zahedan after the bombing."

A Sunni insurgency called Jundallah, which has carried out several other bombings in the southeast over the past few years, claimed responsibility for the blasts, which killed 27.

At least 55 dead as Typhoon Conson calms in China

BEIJING, 18 July—Typhoon Conson weakened to a tropical storm and headed for Vietnam on Saturday after brushing the southeastern Chinese island of Hainan and pounding the Philippines, leaving at least 55 dead.

Philippine authorities warned the toll could rise further with dozens missing days after Conson struck the main Luzon island, including the capital Manila, on Tuesday with a ferocity that caught weather forecasters by surprise.

The typhoon destroyed thousands of homes, sank or damaged dozens of boats, uprooted trees that crushed people to death and snapped power lines.

In China the storm killed at least two people, tore down trees and ripped

up electricity pylons when it hit Hainan on Friday evening, local officials said. Authorities on the popular tourist island evacuated around 40,000 people from the most vulnerable areas before the storm barreled inland.—Internet

Tesla, Toyota teaming up to make electric-powered RAV4s

TOKYO, 18 July—Palo Alto electric-car maker Tesla Motors and Japanese auto giant Toyota Motor confirmed on Friday that they're working to build a new electric-powered version of Toyota's RAV4 crossover-utility vehicle.

Under an agreement by the two automakers, Tesla will produce a fleet of RAV4 prototypes with electric powertrains this year. The two companies will aim to start selling electric-powered RAV4s by 2012.

It was unclear whether the new vehicles would be built at the NUMMI auto plant in Fremont, where Tesla plans to manufacture its electric Model S sedan beginning in 2012. A NUMMI spokesman reached on Friday afternoon said he had not heard about the Tesla-Toyota plan.

Tesla spokeswoman Khobi Brooklyn declined to comment beyond what the company had said in its three-paragraph news release.—Internet

UFOs in China cause flight delays

Two recent UFO sightings have caused a stir in eastern China, with "twinkling lights" causing an airport to shut down temporarily.

The lights were observed above the terminal at Hangzhou's Xiaoshan Airport on the evening of 7 July, causing 18 flights to be delayed or redirected, China's official *Xinhua* news agency reported, adding that the lights may have come from a private aircraft. A source told *China Daily* the lights could have been caused by a military operation.

On Thursday, a second UFO was seen above Chongqing, with one witness saying four "lantern-like objects forming a diamond shape" floated above a park for about an hour, *Shanghai Daily* reported.

A 60-metre diameter crop circle found near a heart-shaped forest.

"Crop circles" around world

A crop circle is a large pattern created by the flattening of a crop such as wheat or maize.

The first crop circle was found in Warminster, England, in the 1970s. Since then, hundreds of "crop circles" have been found all around the world, with 90% from the UK.

In 1991, two men from Southampton, England, announced that they had conceived the idea as a prank. Thereafter, many individuals and organizations claimed they had participated in building the "crop circles."

Chris James holds a bottle of *Veuve Cliquot champagne* found in his Scottish castle in 2008 and believed at that time to be the oldest of its kind in existence, dating from 1893.

Divers find oldest champagne in Baltic wreck

A group of divers exploring a shipwreck in the Baltic Sea have found bottles containing what is thought to be the oldest drinkable champagne in the world, made in the late 18th century. "I picked up one champagne bottle just so we could find the age of the wreck, because we didn't find any name or any details that would have told us the name of the ship," diver Christian Ekstrom from Aland told *Reuters* on Saturday.

Ekstrom and his Swedish diving colleagues opened the bottle and tasted the contents. "It was fantastic... it had a very sweet taste, you could taste oak and it had a very strong tobacco smell.

Three-year-old reads, gives medical advice

Italian doctors say they're amazed by a 3-year-old prodigy who reads newspapers, operates the family's television remote and even gives medical advice.

The parents from the town of Perignano near Pisa say the boy, named 'Ettore,' taught himself almost all these skills just by observing adults,

ANSA news agency reported. "We started teaching him the alphabet for fun. We would never have imagined his abilities would develop like this," Ettore's father Francesco Grillo, a 44-year-old artist, said.

"Then when he was about two he started to read newspapers and TV guides," Grillo said. "Initially we thought he

memorized phrases and repeated them parrot-like. But then we realized he was reading for real." Local medical experts say are impressed.

"Usually learning to read is a process that takes place at a much later stage, at school age, and it's a gradual process," said Dr Amerigo Celandroni, head of the local hospital's pediatric clinic.

Paris Hilton caught with marijuana

PARIS, 18 July—Paris Hilton was briefly detained in Corsica after sniffer dogs detected a "quite small" quantity of marijuana in her bag, a French newspaper reported on Saturday.

Corse Matin newspaper said officers at the airport in Figari found about one gram's worth of marijuana. Hilton, who was transiting the French Mediterranean island in a private jet on Friday, was hauled in for questioning and released about 30 minutes later,

the report said.

In a story posted on its Web site, the newspaper said Hilton was travelling along with "personalities close to power in Malaysia" from the French capital to Porto Cervo, in Sardinia.

In a posting on the *TwitLonger* site Saturday, Hilton wrote, "Just to put an end to these rumors. The stories saying I have been arrested are completely false!" "I am having the best vacation of my life," the posting said.

Earlier this month,

Paris Hilton—INTERNET

Hilton was arrested after the Brazil-Netherlands World Cup match in Port Elizabeth, South Africa, on suspicion of possession of marijuana.

U2 is world's top earning band

NEW YORK, 18 July—Irish rockers U2, who netted \$130 million from their massive world tour and other deals, are the world's top-earning musicians, according to *Forbes.com*.

The group made \$10 million in ticket sales on each tour stop and, along with merchandising revenue, hit the top of the list ahead of Australian heavy metal group AC/DC, who earned \$114 million from their worldwide tour.

R&B singer

Beyonce Knowles came in third with \$87 million, three spots above her husband, rapper Jay-Z.

New Jersey native Bruce Springsteen and his E Street Band and pop diva Britney Spears rounded out the top five.

"Nearly half of the artists that make up this year's list of the top-earning music acts have been around long enough that they could have appeared on the soundtrack to "Back to the Future," *Forbes.com* said.—Internet

One of Bollywood's youngest producers learns the ropes

CALCUTTA, 18 July—She is one of the youngest producers in Bollywood, an industry that has few active women producers. Sure enough, 23-year-old Rhea Kapoor says she found the job of making 'Aisha' challenging and learnt that one has to swallow one's ego to run a project smoothly in the film industry.

"The most difficult part is that you have to take responsibility for everything.

If anything goes wrong, it's your fault. You have to swallow your ego a lot of times to balance things and get the work done," Rhea told IANS.

The daughter of actor Anil Kapoor and younger sister of actress Sonam Kapoor, Rhea never planned to get into production.

"It was not that I had planned to get into production.—Internet

World's oldest opera singer dies at age 98

HONG KONG, 18 July—The world's oldest opera singer, Cantonese Opera star Luo Pinchao, has died. He was 98.

China's official *Xinhua News Agency* reported Friday Luo passed away at his home in the southern city of Guangzhou on Thursday.

Ranked the world's oldest opera singer by the Guinness World Records, Luo was born in June 1912 and began performing in 1930. Cantonese Opera is a form of traditional Chinese theater delivered in the southern dialect.

Barcelona agrees 9.5 m euro Adriano deal with Sevilla

MADRID, 18 July — Spanish champions Barcelona agreed a 9.5 million-euro deal with Sevilla to sign Brazilian utility player Adriano Correia, the club said on Friday.

The 25-year-old, who can play at full-back or as a wide midfielder, will

Sevilla's Brazilian midfielder Adriano Correia (L) tussles with Barcelona's Lionel Messi during the friendly match.—INTERNET

cost an initial fee of 9.5 million euros and a conditional four million extra depending on his performances.

The deal depends on Adriano passing a medical on Saturday at the club's Camp Nou stadium.

Adriano has been at Sevilla since 2004, twice tasting success in both the King's Cup (2007, 2010) and the UEFA Cup (2006, 2007).

He would become the first player to move to Barcelona since the arrival of new club president Sandro Rosell at the beginning of July.

Barca have already completed the signing of Spanish international striker David Villa, who arrived from Valencia for a fee close to 40 million euros.—INTERNET

West Ham sign Barrera and Piquionne

LONDON, 18 July — West Ham signed Mexico World Cup winger Pablo Barrera from Pumas UNAM for four million pounds and also landed French striker Frederic Piquionne from Lyon on Friday.

Barrera agreed a four-year contract with the English Premier League club after passing a medical and receiving his work permit.

The 23-year-old's deal has the option of a further one-year extension.

Barrera, who played three times for his country at the World Cup, was the second signing made by new Hammers boss Avram Grant and

Thierry Henry practices with New York Red Bulls

UPPER MONTCLAIR, 18 July—Thierry Henry practiced with the New York Red Bulls for the first time since signing with the MLS team earlier this week.

Henry and the Red Bulls went through a light training session on Friday at Montclair State University. While the 32-year-old wants to play in Saturday night's MLS game at Columbus, the team is going to delay his debut until next week because he has not played since the World Cup almost three weeks ago.

Henry's first game will be in an exhibition against English Premier League team Tottenham Hotspur on Thursday night.

"You don't even know how happy I am," Henry said. "I was so happy to come here and finally get to see my teammates. Obviously in the past two

New York Red Bulls new soccer player Thierry Henry, of France, runs during team practice at Montclair.—INTERNET

days I've been doing a lot of stuff, the presentation, some (television) shows, but I came here to play so I was so in a rush to meet the guys."

Henry said he will accompany the team to Columbus.

Wall scores 31 points in win over Hornets

LAS VEGAS, 18 July — John Wall scored 31 points in the Washington Wizards' 90-89 summer-league win over the New Orleans Hornets on Friday night.

The top pick in the draft had 13 points during an 18-0 run in the third quarter. He capped the run with a steal and a transition dunk that put Washington up 62-60 with 2:05 left in the period. The former Kentucky sensation made 10 of 23 shots and had the highest total by anyone in the summer so far.

The Wizards won the game on Lester Hudson's jumper at the buzzer. The Hornets took an 89-88 lead

on Quincy Pondexter's three-point basket with 2 seconds left in the game.

Maurice Ager led the Hornets with 23 points. INTERNET

30 golfers back to finish 2nd round at St Andrews

ST ANDREWS, 18 July — British Amateur champion Jin Jeong and the other 29 players who returned to St Andrews on Saturday to finish the second round found the Old Course more to their liking.

Facing only a cool breeze, Jeong birdied the 18th hole to complete a remarkable 2-under 70. Of the last 105 players to tee off in the second round, Jeong, Alejandro Canizares (71) and Darren Clarke (70) were the only players to break par. Now comes the hard part.

Everyone is still chasing Louis Oosthuisen (WUHST-hy-zen) of South Africa, who missed the wicked wind on Friday morning in his round of 5-under 67 that put him at 132 and eventually gave him a five-shot lead over 50-year-old Mark Calcavecchia.—INTERNET

Strong magnetic, volcanic activity on Mercury

SCIENCE DAILY, 18 July—NASA's MESSENGER spacecraft's third and last mission reveals that Mercury is witnessing strong magnetic disturbances and volcanic activity, media reported Thursday.

Scientist analyzed data collected by the spacecraft during its latest flyby of the small, rocky planet last September and published their findings in journal Science.

The probe found that magnetic field on the planet was releasing energy in violent magnetic disturbances that are far more intense than those seen on Earth.

The flyby also discovered a basin that had been formed by a relatively recent impact, which suggests strong volcano activity that may have
