Nagapauk Bridge commissioned into service

The opening ceremony of Nagapauk Bridge on DaikU-Sittoung Road in Waw Township.
MNA

NAY PYI TAW, 27 Aug—Nagapauk Bridge on DaikU-Sittoung Road in Waw Township, Bago District, Bago Region was commissioned into service as the fifth bridge inaugurated in the time of the government of the Republic of the Union of Myanmar this morning.

The bridge was constructed by the Bridge Construction Special Group No. 6 of the Public Works under the Ministry of Construction.

Union Minister for Construction U Khin Maung

Myint explained construction procedures of the bridge and Chief Minister of Bago Region U Nyan Win expressed thanks for emergence of the bridge on behalf of the local people.

Nagapauk Bridge at mile post No. 7/4 on DaikU-Sittoung Road is of RC type facility.

The bridge is 240 feet long with 24-ft wide two-lane motorway flanked by 3-ft wide pedestrian walks. It can withstand 60 tons of loads inclusive of the vehicle. The bridge lies on the short cut linking DaikU

Our Three Main National Causes

- * Non-disintegration of the Union
- * Non-disintegration of National solidarity
- * Perpetuation of Sovereignty

on Yangon-Mandalay Union Highway and Sittoung on Yangon-Bago-Mawlamyine Road. The previous route was 46 miles in length and the short cut on which Nagapauk is located has lessened the distance between DaikU and Sittoung to 21 miles and 6 furlongs. The bridge will contribute swift commodity flow, economy, social affairs, education health and administration of the region.

In the time of the government of the Republic of the Union of Myanmar, five above-180-ft bridges have been opened in Regions and States including Nagapauk Bridge commissioned today.

The Union Minister and the chief minister then visited the construction site of Bridge No. 1/6 which will link the Bago-Sittoung Canal, being constructed by Bridge Construction Special Group No. 2 on DaikU-Sittoung Road. The Union Minister called for early completion of the bridge in accord with the set standards and parallel completion of the approach roads and looked into progress of the bridge.—MNA

Thaukyaykhat (2) Hydropower Project to satisfy electric power demand of State and people

Article: Nyi Nyi Tun (MNA); Photos: Than Oo (MNA)

Sufficient electricity plays a key role in the drive for progress of State economy and socio-economic life of the people. Thus, the government on its part is implementing the hydropower projects to be able to supply more volume of electricity to the people across the nation.

These projects are being implemented at the rivers, creeks and basins as locations of water resources.

In Bago region, construction of dams and generating of hydropower are being undertaken with momentum by effectively utilizing rivers and creeks that originate at Bago mountain ranges. At present, the local people can sufficiently use water for agricultural purpose as well as effectively use electricity.

Likewise, a total of 13 projects to generate hydropower are located at the basin of Sittoung River by utilizing the water resources. These projects comprise four completed hydropower projects generating 355 megawatts, six implementing projects to generate 475 megawatts and three projects under way to generate 410 megawatts.

(See page 8)

Photo shows progress in construction of Thaukyaykhat (2) Hydropower Project.

PERSPECTIVES

Sunday, 28 August, 2011

Emphasize timely completion of projects meeting standards

Electric power is playing an important role in development of economy, production, service and social sectors of the State. Based on natural power of rivers, creeks and other water resources, hydropower projects are being implemented with momentum so as to ensure supply of larger volume of electricity.

Especially, hydropower plants are built at the basins of larger water resources, namely Ayeyawady, Chindwin, Sittoung, Thanlwin rivers and other rivers. At present, concerted efforts are being made for timely completion of Thaukyaykhat (2) Hydropower Project on Thaukyaykhat Creek, about 14 miles east of Toungoo in Bago Region.

The project installed with three generators will generate 120 megawatts. After erecting Toungoo power grid, electricity will be supplied to Nay Pyi Taw and Bago Region along regional power lines through the main power station.

Thaukyaykhat (2) Hydropower Project is the first-ever project for which permission is granted to the private entrepreneurs through BOT system in the electric power sector. Region and State governments will carry out generating and supply of electricity in the respective regions on a manageable scale.

Being a pilot project for the private sector, Thaukyaykhat (2) Hydropower Project is to be implemented through multifaceted approach to make sure that every level of the project meets set standard. It is necessary to set sights on reducing charge of electricity by controlling the cost of implementation.

At present, progress of modern industries reflects improvement of socio-economy of the people. As the opportunities have been created for the private sector, the private entrepreneurs are to join hands with the government in implementing more and more hydropower projects and generating electricity so as to develop not only the industrial sector but also the socio-economic life of the people.

IT Business Plan Contest for computer fanatics

YANGON, 27 Aug—Myanmar Computer Federation and CIESF will jointly organize the IT Business Plan Contest.

Any Myanmar citizen may take part in the mobile applications such as tele-medicine, tele-education and tele-social network events of the contest.

Competing projects are to be submitted to the office of MCF, not later than office hours on 15 September. Ten projects selected at the first level will be announced on 22 September.

For further information, visit www.myanmarictawards.org and dial 01-652307 of MCF at Myanmar Info-Tech in Hline Township, Yangon.

Bangladeshi foreign secretary concludes visit

5th Annual Foreign Office Consultations Meeting between Myanmar and Bangladesh in progress.
MNA

NAY PYI TAW, 27 Aug — The Bangladesh delegation led by Foreign Secretary of the People's Republic of Bangladesh Mr Mohamed Mijarul Quayes, who is on an official visit to the Republic of the Union of Myanmar at the invitation of Deputy Minister for Foreign Affairs U Maung Myint, attended the 5th Annual Foreign Office Consultations Meeting between Myanmar and Bangladesh held at the meeting hall of the ministry here on 25 August.

During the consultations, leaders of the two delegations exchanged views on further strengthening the existing friendly relations and cooperation between the two countries in the areas of trade, agriculture, energy, hydropower project,

transportation, information and communication technology, culture and tourism as well as cooperation at the UN and international fora.

After the consultations, the Bangladeshi foreign secretary also paid courtesy call on Union Minister for Foreign Affairs U Wunna Maung Lwin at 11.40 am.

Yesterday, the Bangladesh delegation visited Bagan where they paid homage to the famous pagodas. They visited Bagan Archaeological Museum and U Ba Nyein Lacquerware House in Bagan as well.

The foreign secretary and party, after paying an official visit to Myanmar, left Yangon for Dhaka by air this afternoon.—MNA

Monywa Zone Inter-University/Degree College Football Tournament kicks off

NAY PYI TAW, 27 Aug—The Monywa Zone Inter-University/Degree College Men's and Women's Football Tournament of Higher Education Department

(Upper Myanmar) under the Ministry of Education kicked off at the people's sports ground in Sagaing Region on 24 August, with an address by

Deputy Minister for Education U Ba Shwe.

In the men's event, Monywa Institute of Economics beat Shwebo University 3-0.

A total of 10 men's

and women's teams from Monywa University, Monywa Institute of Economics, Shwebo University, Sagaing Institute of Education and Kalay University are participating in the tournament that will last up to 1 September.—MNA

16 injured in suicide car bomb in Kandahar city, Afghanistan

KANDAHAR, 27 Aug—At least 16 people were injured on Saturday when a suicide car bomb went off in Kandahar city, capital of Kandahar Province, 450 km south of capital city of Kabul, police said.

“A suicide bomber, with intention? of attacking police, rammed his explosive-laden car to the wall of third sub-district police station in Kandahar City at around 01:00 pm local time Saturday, injuring 16 people,” General Abdul Raziq, provincial police chief told *Xinhua*.

A health official in Kandahar hospital on condition of anonymity told *Xinhua* that 20 injured people including 13 children were admitted to hospital from the incident with most of them in stable conditions.

Police has started the investigation and details will be released to media after that, Raziq added. Security personnel have cordoned off the area in precautionary measures.

The Taliban-led insurgency has been rampant since the militant group announced to launch spring offensive from May 1 against Afghan and NATO-led troops stationed in Afghanistan.

This is the second bomb attack on the eve of Eid-ul-Fitar, the Muslims festival in Afghanistan.

Four civilians were killed and 21 other people including 15 security forces were injured when a suicide car bomb targeted a bank branch in Lashkar Gah, the capital of neighboring Helmand province, earlier Saturday.—*Xinhua*

INTERNET

LASHKAR GAH, 27 Aug—An explosion killing four people and wounding 21 others, rocked Lashkar Gah, the capital of southern Helmand Province 555 km south of capital city Kabul on Saturday, went off at around 11:45

am local time. As a result four civilians were killed and 21 others including six civilians, 10 Afghan soldiers and five Afghan police sustained injuries,” Daud Ahmadi told *Xinhua*.

He also added the blast happened next to a local bank branch when a number of Afghan soldiers were receiving their salaries.

The officials also blamed the attack on “the enemies of peace,” a term used by Afghan officials against Taliban militants. But the outfit fighting Afghan and NATO-led troops have yet to make comment.

Gunmen abduct, kill retired colonel in Pakistan

PESHAWAR, 27 Aug—A police official says gunmen kidnapped and killed a retired army colonel in northwestern Pakistan, and a police officer died trying to rescue him.

Umer Hayat says the gunmen seized Col Shakeel Ahmad on Saturday as he was on his way home from

morning prayers in the garrison city of Kohat.

Hayat says police intercepted the gunmen’s car at a checkpoint and engaged them in a firefight. One police officer was killed and two others were wounded. The gunmen escaped and later shot dead Ahmad and abandoned his body alongside a road.

Attack on Algerian military academy kills 18

ALGIERS, 27 Aug—A bomb explosion followed by a suicide attack outside a military academy in Algeria killed at least 18 officers in training Friday, a hospital said. With at least 20 wounded, the toll was expected to rise, according to the Sidi Ghilas hospital where the victims were taken.

Earlier, a security official had confirmed the deaths of 15 military trainees but said the wounded toll was even higher, in the dozens. The attacks began Friday evening when a bomb exploded just outside a military academy in Cherrhell, 110 miles (180 kilometres) west of the capital, Algiers. Soldiers dining at a restaurant — which was within the base but near its perimeter — raced from their tables to see what had happened, according to security officials. As a crowd gathered, a suicide bomber with explosives strapped to his body drove his motorcycle at them, the officials said, speaking on condition of anonymity, citing policy. The city was sealed off after the attack and the army chief of staff, Gen Gaid Salah, arrived by helicopter shortly after to survey the scene.—*Internet*

Militants from Afghanistan kill 26 in Pakistan

ISLAMABAD, 27 Aug— Hundreds of militants crossed the Afghan border Saturday and attacked three security checkpoints in northwestern Pakistan, killing 26 paramilitary soldiers and police, officials said.

It was the latest of a series of attacks that Pakistani officials say have

been launched from an area of eastern Afghanistan where the US has largely pulled out its troops. The raids have increased tension between Pakistan, Afghanistan and the US.

Armed with heavy weapons, the militants seized control of a local village after attacking the security checkpoints in

Chitral district, said local police official Nizam Khan. Pakistani forces responded to the raid and killed nine insurgents, he said.

But fighting was still ongoing Saturday afternoon, and Pakistani troops have called in helicopter gunships to drive the militants back across the border, said Maj Ghulam Rasool, a member of the paramilitary forces.

Chitral is located across the border from the Afghan districts of Nuristan and Kunar, both of which house significant numbers of Afghan and Pakistani Taliban fighters. The US largely pulled out of the area about a year ago but has recently added additional troops.

Uncommon types of skin cancer include Kaposi's sarcoma, mainly seen in people with weakened immune systems; Merkel cell carcinoma, which is usually found on sun-exposed areas on the head, neck, arms and legs but often spreads to other parts of the body; and sebaceous gland carcinoma, an aggressive cancer originating in the oil glands in the skin.—INTERNET

Scoring system may tell the dying how long they have to live

HEALTH

LONDON, 27 Aug—A new scoring system might be able to tell patients in the final stages of cancer how much time they have left so they can prepare for their passing, British researchers report.

Called the Prognosis in Palliative Care Study (PiPS) predictor model, the scoring system plugs 11 variables into a computer to see how many days, weeks or months a person with advanced cancer most likely has to live. These variables include symptoms, general health status and blood results.

"The PiPS score is still in development, [and] it is certainly not fail-safe," stressed study author Dr Patrick C Stone, of St George's

University of London. "It is, however, slightly more reliable than a doctor's or a nurse's estimate of survival."

Many people with incurable cancer want this type of information, Stone added. "At this stage of a patient's illness, information about prognosis can allow patients sufficient time to prepare for their impending death and to make decisions about where they wish to be cared for," he said. "We would expect the PiPS score to complement the doctor's own intuitive estimate of survival, rather than replace their clinical judgment." One expert in end-of-life care agreed that more accurate estimates would be valuable.—*Internet*

Tiffany's second-quarter sparkles

WASHINGTON, 27 Aug—The May-July period was a real gem for luxury retailer Tiffany, with the jewelry chain recording much shinier profits than Wall Street anticipated. Net earnings were up 33% to 69 cents per share, or 58% to 86 cents per share when excluding nonrecurring charges, on a 30% jump in sales to \$872.7 million.

Tiffany is clearly firing on all cylinders, at a time when the retail industry looks like a barbell. Based on the latest batch of earnings reports higher-end stores like Tiffany are cleaning up, as are lower-end names like Dollar General and Target (with the notable exception of Wal-Mart's weaker sales), while mid-tier chains and restaurants are getting squeezed on both ends: high-income shoppers don't frequent those stores and other households either can't afford them or have traded down.

According to Friday morning's report, Tiffany doesn't see any signs of its earnings growth slowing down. The company hiked its full-year earnings forecast by 20 cents to \$3.65-\$3.75 per share — analysts expect \$3.56 — and projects revenue to grow in the high teens on a percentage basis. On the company's conference call, Tiffany executives

said third-quarter sales are trending above expectations and that the company is having success passing on higher costs for precious metals and gems to customers.

A weaker dollar is also clearly benefiting the company, which said about half of its US sales improvement in the second quarter came from tourist traffic, according to TradeTheNews.com.

Shares of Tiffany rallied 6.6% Friday morning. *Internet*

Markets close higher on Bernanke speech

BUSINESS

NEW YORK, 27 Aug—US markets posted solid gains Friday after Federal Reserve Chairman Ben Bernanke said the central bank was in a wait-and-see mode concerning economic policy. Bernanke declined to announce a third round of quantitative easing, a programme of buying securities that is also known as printing money, but did say the next Fed meeting would be two days instead of one to discuss options.

Markets opened lower but turned higher. By close of trading, the Dow Jones industrial average added 134.72 points, 1.21 percent, to 11,284.54. The Standard & Poor's 500 index added 17.53 points or 1.51 percent to

1,176.80. The Nasdaq composite index of tech-dominated stock surged, adding 60.22 points or 2.49 percent to 2,479.85.

On the New York Stock Exchange, 2,545 stocks advanced and 508 declined on a volume of 4 billion shares traded.

The benchmark 10-year treasury note rose 11/32 to yield 2.197 percent.

The euro rose to \$1.4493 from Thursday's \$1.4379. Against the yen, the dollar fell to 76.63 yen from Thursday's 77.46 yen. Across Asia and Europe, stocks were mostly lower, down 0.12 percent in China and 1.84 percent in India.—*Internet*

Health Tip: Recovering from adenoid and tonsil removal

It's common for people who have just had their tonsils and adenoids removed — usually children — to suffer post-surgical symptoms including a sore throat, low-grade fever and ear pain.

Maintaining a proper diet during recovery can help ease symptoms. The US National Library of Medicine offers these suggestions:

- * Skip highly acidic drinks, such as grapefruit juice or orange juice.

- * Avoid foods that are very hot or spicy.

- * Restrict foods that can irritate a sore throat, including crunchy, raw vegetables and cold cereals.

- * Avoid high-fat dairy products that can thicken mucus and make swallowing more difficult.

Lost Russian satellite a threat in space?

Science

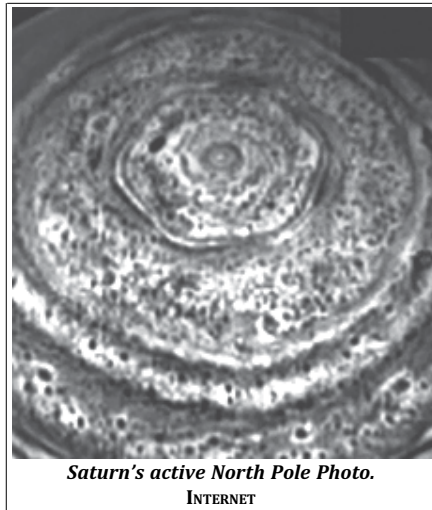

Moscow, 27 Aug—A Russian satellite that was lost in space may pose a threat to other space vehicles or satellites, an official said.

Heavy satellite Express-AM4 was lost 18 Aug, Xinhua reported quoting a source from the Russian space industry. The source told the Interfax news agency that the Express-AM4 "will stay on its orbit for years or even for decades".

It may even collide with other telecommunication satellites from Glonass and GPS groups as well as with the Globalstar and Iridium satellites, the source said.

However, the lost satellite posed no danger to the International Space Station (ISS) because it was on a higher orbit. Russia's space monitoring system, a subdivision of the Russian Space Forces, is working with the US United Space Operations Centre to locate the Express-AM4's position before further launches of new space vehicles.

Russian Space Forces has little hope of regaining control of the Express-AM4 because its batteries were discharged soon after it separated from its booster.

Facebook gets rid of Deals

NEW YORK, 27 Aug—Facebook announced late Friday that it would be bowing out of the daily deal business. The Groupon-inspired Facebook Deals was discontinued after only four months of testing.

In a statement received by Reuters and other outlets, a Facebook spokesperson wrote:

"After testing Deals for four months, we've decided to end our Deals product in the coming weeks. We think there is a lot of power in a social approach to driving people into local business. We've learned a lot from our test and we'll continue to evaluate how to best serve local businesses."

The end of Deals seems like a logical follow after the nixed Facebook Places app, though the company insists that it will still maintain the Check-in feature as well as Ads, Pages, and Sponsored stories; local business aren't being completely shuffled aside.

Facebook Deals began its short-lived existence in April this year, sparking anticipation of heated and frenzied competition with Google Offers, Living Social Groupon and the other sites packed into the cramped pool of local-discount services. Deals had already put down roots in five major cities, set up

deals with merchants in the area and set up offers with other daily deal companies such as ReachLocal, OpenTable, Tippr, aDealio and more.

Does Facebook's retreat say something about the daily deals business?

The vacancy means less pressure for those still in the game (looking at you S-1 filing Groupon), but there has been some criticism of Groupon's business model and talk of the daily deals enthusiasm waning.

Co-founder of Yipit.com Vinicius Vacanti weighed in on the topic, telling Reuters, "I don't believe this means daily deals are not a viable business. It more suggests that large media and tech companies can't just 'turn on' daily deals and expect them to work. It has to be more thoughtfully integrated into their existing product."—Internet

Amazon expedition discovers new monkey

Science

PARA, 27 Aug—A possible new species of monkey has been discovered during an expedition in an unexplored part of the Amazon in mid-western Brazil.

A specimen, which scientists know is a type of Callicebus, or titi, monkey has been turned over to experts at the Emílio Goeldi Museum in the Brazilian state of Para, where it will be studied and formally described. "This primate has features on its head and tail that have never been observed before in other titi monkey species found in the same area," said Julio Dalponte, the biologist who discovered the monkey during the World Wide Fund for Nature-backed expedition.

The expedition found the monkey between the Guariba River and the Roosevelt River in the northwestern part of the Brazilian state of Mato Grosso. The 20-day expedition undertaken in December of 2010 explored four protected areas of the Guariba-Roosevelt Extractive Reserve, the Tucumã State Park

and the Roosevelt River and Madeirinha River. It was intended to gather information to improve the management of these areas.

The team found 48 species of mammal, including armadillos, anteaters, deer and monkeys, as well as 313 species of birds, including some that had only previously been seen in other South American countries. Their survey of fish turned up possible new species, including a catfish, a small, brightly colored tetra, and very small fish known locally as 'piaus.'

They also found threatened species, including a giant anteater, giant armadillo, giant otter, jaguar and ocelot. The area explored faces a litany of environmental and social problems, including illegal logging and fishing, pollution, the expansion of agriculture, violent conflicts over land, a lack of health or education services and electricity, plus a lack of oversight by state and federal authorities, according to the WWF.—Internet

Hurricane Irene rages up US east coast

WILMINGTON, 27 Aug—Hurricane Irene lashed North Carolina with heavy winds, rain and surf Saturday as it neared land on a path threatening the densely populated US east coast with flooding and power outages.

New York City ordered unprecedented evacuations and transit shutdowns as states from the Carolinas to Maine declared emergencies due to Irene, whose nearly 600 mile width guaranteed a stormy weekend for tens of millions of people.

With winds of 90 miles per hour, Irene weakened slightly to a Category 1 hurricane on the five-step Saffir-Simpson scale by

Pedestrians walk past sandbags used to control possible floods at downtown Manhattan in New York on 26 August, 2011.

INTERNET

early Saturday but forecasters warned that it remained a large and dangerous storm. At 5 am EDT (0900 GMT), the centre of Irene was about 35 miles south of Cape Lookout, North Carolina, the US National Hurricane Centre said.

“Some weakening is expected after Irene reaches the coast of North Carolina but Irene is forecast to remain a hurricane as it moves near or over the mid-Atlantic states and New England,”

it said. In summer weather, hundreds of thousands of residents and vacationers had evacuated from Irene’s path. Supermarkets and hardware stores were inundated with people stocking up on food, water, flashlights, batteries, generators and other supplies.

Airlines canceled nearly 7,000 flights over the weekend and all three New York area airports were due to close to incoming flights at noon Saturday.

Losses are expected along the US east coast from high winds, heavy seas, flooding and fallen trees. Irene is the first hurricane to hit the US mainland since Ike pounded Texas in 2008.

Russian submarine successfully tests intercontinental Bulava missile

Moscow, 27 Aug—The Russian nuclear submarine Yuri Dolgoruky successfully test-launched a second Bulava intercontinental ballistic missile early Saturday, the Defence Ministry said.

A defence ministry spokesman said the test marked the first time the Bulava missile had been launched at the maximum distance from the White Sea to the Pacific Ocean, where the weapon successfully reached its target.

The Bulava, expected

to become Russia’s main naval strategic missile, is capable of carrying 10 warheads with a range of 8,000 km.

Only eight of its previous 15 launches were officially declared successful.

The first test launch of the Bulava from the Yuri Dolgoruky was conducted on 28 June.

The missiles previously were launched from the Typhoon class submarine Dmitry Donskoy.

China plans to attract more overseas Chinese scholars in next 5 years

BEIJING, 27 Aug—The Chinese government has set the goal to attract at least 500,000 overseas Chinese scholars from 2011 to 2015 as the country is in large demand of high level talents to boost its development. Scientists, team leaders and other talents in innovative science and technology who can “achieve technological breakthroughs and boost the country’s hi-tech and emerging industries” are the country’s main targets, according to the 2011-2015 blueprint on returned overseas Chinese talents released by the Ministry of Human Resources and Social Security.

The country also aims to attract talents in fields including equipment and manufacturing, information, biotechnology, new material, aviation, environmental protection, energy

resources and modern agricultures.

“China will further improve policies regarding returned overseas Chinese in the next five years in accordance with the country’s economic and social development... and create a favorable environment for them to exert their talents,” said the document.

In addition, the country plans to have 200 business start-up incubators by 2015, which are expected to house 15,000 enterprises run or participated in by returned Chinese who have studied abroad.

Figures show that the current 150 incubators are providing business start-up services for more than 8,000 enterprises and over 20,000 returning students.—Xinhua

Australian police say key drug ring figure held

SYDNEY, 27 Aug—Australian police said they had arrested an alleged key player in a drug ring trafficking heroin and crystal methamphetamine into and around the country.

Asian Crime Squad

detectives arrested 38-year-old Brendan Phuong Tran, along with 49-year-old woman Ngoc Lan Ly, in Sydney on Friday as they drove to the airport. “Police allege the man is a main figure in the alleged syndicate,” New South

Wales police said in a statement. “During a search of the vehicle, police located and seized one kilogram (2.2 pounds) of ice (crystal methamphetamine) and a quantity of cash.” Police also searched an apartment in central Sydney, uncovering a sawn-off shotgun, a revolver, 258 grams of “ice” and drug manufacturing equipment, they said. Cash, drugs and a stun gun were also found in a raid in Western Australia. Authorities said they established an operation four months ago to investigate the alleged large commercial supply and interstate trafficking of illegal drugs such as heroin and “ice”.

The two arrested have both been charged with supplying a large commercial quantity of prohibited drugs.

Internet

This file photo, released by Australian Federal Police, shows shows confiscated methamphetamine, or ice, in Sydney, earlier this year. Australian police say they have arrested an alleged key player in a drug ring trafficking heroin and crystal methamphetamine into and around the country.

5.7-magnitude quake hits Mongolia

BEIJING, 27 Aug—An earthquake measuring 5.7 on the Richter scale hit Mongolia at 6:29 pm. Beijing time Saturday, according to the China Earthquake Networks Centre.

The epicenter, with a depth of 9 km, was initially determined to be at 44.0 degrees north latitude and 104.6 degrees east longitude.—Xinhua

5.4-magnitude quake hits Hindu Kush region, Afghanistan

HONG KONG, 27 Aug—An earthquake measuring 5.4 on the Richter scale jolted Hindu Kush region, Afghanistan at 2011-08-26 20:32 GMT on Friday, the US Geological Survey said.

The epicenter, with a depth of 199.10 km, was initially determined to be at 36.4463 degrees north latitude and 70.6950 degrees east longitude.—Xinhua

Arizona shooting suspect's condition worsens

SAN DIEGO, 27 AUG—The man accused in the Arizona shooting rampage kept himself awake for 50 hours straight after an appeals court stopped forced medication. He walked in circles until he developed sores and then declined antibiotics to treat an infected foot. Already thin, he stopped eating and shed nine pounds.

US District Judge Larry Burns described Jared Lee Loughner's behavior to explain his refusal to overrule prison doctors who decided to resume forced medication July 18. The drugging, he said, "seems entirely appropriate and reasonable to me."

Loughner's attorneys argued unsuccessfully that a court should review whether the forcible medications could resume.

The ruling came in a three-hour pretrial hearing Friday that offered insights into Loughner's fragile condition at federal prison in Springfield, Mo., where he is on suicide watch.

Christina Pietz, a psychologist who is treating him at the prison, testified by phone that Loughner is "less psychotic" than in the past and that she is now more concerned about depression.

She worried that videotaping her sessions with him — as Loughner's lawyers requested — would only exacerbate his ills. She said he turned "almost defeated" and withdrawn when she broached the idea on Wednesday.

Loughner has pleaded not guilty to 49 charges in the Jan. 8 shooting that killed six people and wounded 13 others, including Rep. Gabrielle

Judy Clarke, the lawyer representing shooting suspect Jared Lee Loughner, makes her way towards a federal courthouse Friday, 26 Aug, 2011, in San Diego.—INTERNET

Giffords, at a meet-and-greet event held by the congresswoman outside a Tucson grocery store.

Loughner has been at the Missouri prison since late May after mental health experts determined he suffers from schizophrenia. Burns ruled him mentally unfit to stand trial.

Five killed in chemical explosion in South Korea

SEOUL, 27 Aug— Authorities say five people were killed in an explosion during an experiment at a chemical company in southeastern South Korea.

An official at Gyeongbuk provincial fire service headquarters said Saturday the explosion took place at TK Chemical company in the city of Gumi. He declined to be named

because investigators were still trying to determine details of the blast.

Hospital and company officials confirmed that five people were killed while two others were being treated for serious burns.

The company's Web site says TK Chemical mainly produces synthetic resins like polyester.

US passenger train derails in Nebraska, 22 lightly injured

WASHINGTON, 27 Aug—Twenty-two passengers were lightly injured on Friday after a train derailed in the central US state of Nebraska, local media reports said.

The derailment of the Amtrak train, with 175 passengers and 17 crew members on board, was caused when it struck a demolition crane in southwest Nebraska. Two locomotives and three passenger cars were off the rails but no major injuries were caused, local officials were quoted as saying.

The train was running on the route from Emeryville, California to Chicago, when the accident occurred at about 8 a.m. local time near Benkleman, near Nebraska's border with the states of Kansas and Colorado.

The injured passengers, 20 of whom were on the train, were sent to local hospitals for treatment. Most of them suffered minor injuries in the back, shoulder and neck, and were released by Friday evening, Dundy County emergency director Elaine Frasier told reporters.

Amtrak later rented private buses for the passengers who were not hurt to resume their journey, the reports said.—Xinhua

Indonesian police foil train hijack

JAKARTA, 27 Aug— Indonesian police in Jakarta foiled a hijack on a train carrying hundreds of passengers during the peak of people exodus to home towns for celebrating the Islamic festivity on Saturday, spokesman of Transport Ministry Bambang Ervan said here.

Three hijackers had hijacked the train from a station in West Java and forced the locomotive engineer to direct the train out of its route, which may have caused a crash during the rush hours as over tree million people are forecast traveling by train during the exodus, the spokesman told Xinhua by phone.

"This was very dangerous, the train could have a collision at any time," he said.

The hijackers were paralyzed by policemen when the train stopped at the Senen train station in Jakarta.—Xinhua

E China's Fujian orders ships to return to harbor as Typhoon Nanmadol approaches

FUZHOU, 27 Aug—Southeast China's coastal province of Fujian has ordered local ships to seek harbor as approaching Typhoon Nanmadol could cause huge waves, according to the provincial flood control headquarters on Saturday.

The typhoon was 1,000 km southeast of Fujian with a wind speed of 180 km per hour at its center at 8 a.m. Saturday, said the headquarters.

It is moving towards southern Taiwan at a speed of 8 km per hour, the headquarters said, predicting high tides in Fujian's coastal regions.

The headquarters ordered all ships from Taiqian fish farm to return to the harbor before 8 p.m. Saturday and those of Minnan fish farm before Sunday midday as the two farms are closest to Taipei.

Thaukyaykhat (2) Hydropower Project...

(from page 1)

The completed projects are 280-megawatt Paunglaung Hydropower Project, 30-megawatt Khabaung Hydropower Project, 25-megawatt Yenwe Hydropower Project and 20-megawatt Zaungtu Hydropower Project. The undergoing projects are 140-megawatt Upper Paunglaung Hydropower Project, 40-megawatt Nanchong Project, 120-megawatt Thaukyaykhat Project (2), 75-megawatt Shwegyin Project, 40-megawatt Phyuhaung Project and 60-megawatt Kunchaung Project. Plans are underway to implement Middle Paunglaung (100-megawatt) Project, Thaukyaykhat (1) (150-megawatt) Project and Bawgata (160-megawatt) Project. The projects can generate

project to generate 120 megawatts. The project was aimed at supplying electricity to be generated from the project to the national power grid, preventing floods at Sittoung River basin and enabling the private company to generating electricity in the market-oriented economic system. Then, he conducted us round the project site.

Thaukyaykhat Creek has 840 square miles of water catchment area and it has 3,390,000 acre-feet of inflow water annually. The dam of the project can store 360,000 acre-feet of water at full brim.

The project comprises construction of main hydropower structures such as main embankment, saddle dyke, spillway, water diversion tunnel, water tunnel, power intake structure, penstock steel

Progress in construction of spillway seen at Thaukyaykhat (2) Hydropower Project.

cubic-feet per sec. The water diversion tunnel, 34.5 feet diameter and 1742 feet long, has been built. So, the facility came to operation on 10 October 2010. The water tunnel is under construction, and it has completed by 50 per cent. So far, construction

to complete the project in 2012.

The Ministry of Electric Power No. 2 will take responsibility for supply of hydropower to be generated from the project. The 12.36 miles long Thaukyaykhat (2)-Toungoo 230-KV power grid will be constructed to link the project and Toungoo Main Power Station. Electricity will be supplied to the power grid through Toungoo Main Power Station. After that, electricity will be supplied to Nay Pyi Taw and Townships in Bago Region through local power lines. The 120-megawatt project will feed 74 megawatts to Nay Pyi Taw, 21.9 megawatts to Toungoo District and 29 megawatts to Bago

District. To do so, a switch bay will be installed at Toungoo Main Power Station in addition to Thaukyaykhat (2)-Toungoo 230-KV power grid.

Indeed, the Thaukyaykhat (2) Hydropower Project is first project of its kind to allow the private sector through BOT system in the electric power sector. In the future, private entrepreneurs will be allowed to generate and supply electricity. According to the Constitution, region and state governments will have the opportunity to generate, supply and sell electricity to their respective regions on a manageable scale.

Therefore, Thaukyaykhat (2) Hydropower

Project will be a pilot project of the private sector in the electric power sector. As implementation cost of the project will increase the charge of electric meter bills, emphasis is being placed on reducing the charge of electric meter bills by controlling production cost and on minimizing loss of electricity in supply routes. In the future, the private sector will enjoy the opportunity to carry out the tasks in electric power sector. As such, tasks of the Thaukyaykhat (2) Hydropower Project are systematically being carried out as a model project.

UK's atomic clock is 'world's most accurate long-term timekeeper'

WASHINGTON, 27 Aug—A caesium fountain clock that keeps the United Kingdom's atomic time is now the most accurate long-term timekeeper in the world.

It was confirmed after the evaluation of the clock by a team of physicists at the National Physical Laboratory (NPL) in the United Kingdom and Penn State University in the United States.

The clock is one of

an elite group of caesium fountain clocks that have been built by the timing labs in Europe, the United States, and Japan as their national "primary frequency standard" for the measurement of time.

These national standards are averaged to produce International Atomic Time and Universal Coordinated Time, which are used as time scales worldwide for such critical

processes as global communications, satellite navigation and surveying, and time stamping for the computerized transactions of financial and stock markets.

The methods used to improve the UK clock also can be used to evaluate the caesium fountain clocks of other countries, substantially improving the world's most accurate methods of keeping time.

"The improvements that we report in our paper have reduced significantly the caesium fountain clock's two largest sources of measurement uncertainties — Doppler shifts and the microwave-lensing frequency shift," said NPL Project Leader Krzysztof Szymaniec.

The physicists evaluated the recently upgraded caesium fountain clock with physical measurements at NPL and mathematical models developed at Penn State.—Internet

Two British military men injured skydiving in California

LOS ANGELES, 27 Aug—Two members of the British military conducting skydiving training in southern California collided in mid-air on Friday and were hospitalized with serious injuries, authorities said.

It was not immediately clear if the two men's parachutes opened before they hit the ground in Lake Elsinore, about 60 miles southeast of Los Angeles, said Cheri Patterson, a spokes-

woman for the Riverside County Fire Department.

One of the skydivers was in cardiac arrest when he was taken to the hospital after the mid-air collision and the other was in critical condition, Patterson said.

Both were members of the British military training at the Skydive Elsinore facility, said Riverside County Sheriff-Coroner spokeswoman Corporal Courtney Donowho.

Authorities did not

release the identities of the skydivers, but Patterson said both men were in their 20s.

A spokeswoman for the British Consulate in Los Angeles could not be reached for comment.

Rare artifacts on display at Golden Temple exhibition in London

LONDON, 26 Aug—Rare artifacts are on display at the world's first exhibition on Amritsar's famous Golden temple in central London.

The Rolls Royce engine of a 787 Dreamliner is pictured as the aircraft sits on the tarmac at Boeing Commercial Airplanes manufacturing facilities at Paine Field, Everett, Washington during the jetliner's certification event on 26 Aug, 2011.—INTERNET

Over 80 artifacts, including the earliest known paintings and photographs of the temple, along with film footage and eye witness accounts from western travellers. The 10-week show has been organized by the UK Punjab Heritage Association. The show has already attracted thousands of visitors from across the world. The exhibition traces the temple's history, from the 1800's up until the middle of the

20th Century, The BBC reports.

"The Sikhs at one point were important players on a world stage. We want people to be able to experience that with real objects," Parmjit Singh, the museum's curator was quoted, as saying. Most of the artifacts being showcased have been borrowed from private collectors and have never been seen by the public anywhere in the world.

7-year-old Asian girl in UK dies after rubber ball bounces down her throat

LONDON, 27 Aug—A seven-year-old girl in Britain was choked to death after a small rubber ball she was playing with bounced into her mouth.

Kiran Mir was playing with the bouncy ball at home when it became lodged in her throat, the Daily Mail reports.

Her father, Shahid, 45, said that his wife Shakeela, who was in the same room when the incident took place, noticed Kiran was unable to breathe, and tried to reach for the ball in her mouth.

"She tried to reach the ball in her mouth, and started slapping on her back. But the ball wouldn't budge," the paper quoted him, as saying. In a statement read out to the inquest, Shakeela said the day before she had bought two small rubber balls for Kiran and one for her other children.

Speaking at the family's home in Sattley, Birmingham, Shahid said his daughter's death had 'killed all his happiness, and has left everyone devastated'. Kiran, one of four children, died on March 1 after suffering a heart attack and severe brain damage.—Internet

Indonesia's ferry sinking toll climbs to 10, scores missing

JAKARTA, 27 Aug— The number of fatality of ferry sinking in Kolaka waters of Southeast Sulawesi in eastern part of Indonesia earlier Saturday rose to ten and scores of people still went missing, rescuer said.

Ferry Windu Karsa sank at 00:30 local time Saturday (1530 GMT Friday) after leaving Bajo town of South Sulawesi, according to rescuer at Search and Rescue Office at Southeast Sulawesi named only Surajad.

The rescue for the victims had been carried out since after midnight as the

authorities predicted there are a number of people still went missing, he told *Xinhua* by phone.

"We forecast that there are scores of people still go missing and the rescue will keep continuing," he said.

According to the manifest, the number of

Super-typhoon Nanmadol lashes Philippines

MANILA, 27 Aug— Super-typhoon Nanmadol battered the northern tip of the Philippines on Saturday, bringing heavy rain and causing landslides that left at least four people dead or missing, civil defence officials said.

Nanmadol, the strongest storm to hit the country this year, was hovering over the northern province of Cagayan, raising fears of more devastation to come the longer it remains in the area, officials said.

Two children were killed in a landslide in a

hilly area north of the Philippine capital while two fishermen went missing in rough waters in separate incidents as the storm battered the country, regional officials reported.

More landslides are expected as heavy rains fall on mountainous areas, warned Major Rey Balido of the government monitoring centre.

"For the past three days, it has been raining so the soil has been saturated and there will be landslides," he told *AFP*.

"There will be more floods also because the typhoon has been almost stationary so the

rains just keep falling. It will take a longer time to traverse the area and will

UN lifts Nigeria wildlife trade ban

MANILA, 27 Aug—The UN wildlife trade regulator said Friday it was lifting its 2005 suspension on wildlife commerce with Nigeria, citing the country's improved efforts to combat illegal trade.

"Nigeria has significantly reduced illegal trade," Juan Vasquez, a spokesman with the Convention on International Trade in Endangered Species, told *AFP*. He said that the regulator had called on states to suspend such dealings with Nigeria as it was the "hub" of much illegal wildlife trade in West Africa, notably in ivory but also in reptile skins.—*Internet*

20 endangered Siamese crocodiles hatch in Laos

VIENTIANE, 27 Aug— One of the world's rarest crocodile species has moved a little bit further from extinction with the hatching of 20 wild eggs plucked from a nest found in southern Laos.

Experts believe there could be as few as 300 Siamese crocodiles remaining in the world's swamps, forests and rivers, so the discovery of the nest — the first found in the mountainous, jungle-clad country since

2008 — is a significant step in the rehabilitation of a species that was declared extinct in the wild in 1992.

Since then, tiny populations have been discovered in remote corners of its range, which used to include most of Southeast Asia. Still, the crocs remain critically endangered, according to the International Union for Conservation of Nature's Red List, the acknowledged authority

on the status of global biodiversity.

Under the soft red light of an incubator, the 20 baby crocodiles tapped and cracked their way into the world last week. Their nest was found in the southern province of Savannakhet in June by a team of villagers trained by the New York-based Wildlife Conservation Society, which is working to save the species in landlocked Laos.—*Internet*

Four of 26 trapped miners rescued after northeast China colliery flood

QITAIHE, 27 Aug— Four of the 26 miners who were trapped for more than 100 hours in a flooded pit in northeast China's Heilongjiang Province were rescued on Saturday, the rescue command center said.

It said three of the survivors had been sent to hospital, and rescuers were still helping the fourth one back to the ground as of 7:20 p.m.

Rescuers had drained 56,150 cubic meters of water as of 2 p.m. Saturday and the water level dropped by 10.44 meters.

The flooding occurred on Aug. 23, when 45 miners were working in a pit of the Hengtai Coal Mining Co. in Boli County of Qitaihe City. Nineteen miners managed to escape.

The provincial government ordered the mine to stop production in 2007. But the owner restarted production without permission on Aug. 16, according to the

Blood pressure guidelines revised in England and Wales

LONDON, 27 Aug — Patients thought to have high blood pressure should have the diagnosis confirmed at home, according to new guidelines.

Patients in England

and Wales will be offered extra checks using a mobile device that records blood pressure over 24 hours, says the watchdog NICE.

A quarter of patients may find visiting a GP stressful, leading to misdiagnosis and being given drugs they do not need. The move could save the NHS £10.5m a year, predictions suggest.

High blood pressure (blood pressure of 140/90mmHg or more) affects about a quarter of all adults in the UK.

It is a leading risk factor for heart disease or stroke and costs the NHS about £1bn a year in drugs alone. Currently, most patients found to have high blood pressure for the first time are given a formal diagnosis if their blood pressure is raised at two subsequent visits to the doctor.

They may then be prescribed medication to lower their blood pressure.

Research suggests, however, that about a quarter of patients actually have "white coat" hypertension — where blood pressure is raised temporarily due to stress.

Faithful dog guards SEAL'S coffin

ROCKFORD, 27 Aug — A Labrador retriever belonging to a US Navy SEAL remained at his side during his funeral in Rockford, Iowa, guarding his coffin, relatives say. A cousin, Lisa Pembleton, took a picture of the dog, Hawkeye, during the service on Friday for Petty Officer Jon Tumilson. He was one of the SEALS killed last month in Afghanistan when armed groups shot down a Chinook helicopter.

"It took several attempts since every time I wasn't crying and could focus on taking it, there was a SEAL at the microphone and I didn't want to take a picture with them for security and respect reasons," Pembleton told ABC News.

"Our family is devastated to say the least." Hawkeye now has a home with one of Tumilson's friends. Tumilson had been in the Navy for 16 years. He was posthumously awarded the Purple Heart and Defence Meritorious Service Medal. — Internet

Profits of China's industrial businesses up 28.3 pct in Jan-July

BEIJING, 27 Aug— China's industrial enterprises reported a year-on-year increase of 28.3 percent in profit the first seven months, the National Bureau of Statistics (NBS) said on Saturday.

The growth rate was slightly down from the 28.7 percent in from January to June.

Profits of the enterprises in the seven months amounted to 2.8 trillion yuan (430.77 billion US dollars). The data was collected from a pool of industrial businesses with at least 20 million yuan of annual sales revenue.

Profits of private businesses rose 46.6 percent to 760.8 billion yuan, the fastest growth compared with a 20.4 percent rise for state-owned enterprises and 14.4 percent for foreign-invested companies.

Among 39 industries surveyed, 37 sectors reported profit growth while the communications equipment, computer and other electronic products manufacturing saw profits shrink.

Non-ferrous metal mining industry posted the biggest profit gain of 58.7 percent. It is followed by a 56.6 percent rise in chemical products making.

Arctic sea routes open as ice melts

LONDON, 27 Aug — Two major Arctic shipping routes have opened as summer sea ice melts, European satellites have found. Data recorded by the European Space Agency's (Esa) Envisat shows

already eyeing the benefits these routes may bring if they remain open regularly. The two lanes have been used by a number of small craft several times in recent years.

But the Northern Sea Route has been free enough of ice this month for a succession of tankers carrying natural gas condensate from the northern port of Murmansk to sail along the Siberian coast en route for Thailand.—Internet

Insects use antibacterial secretions to protect young

TUEBINGEN, 27 Aug — Scientists have confirmed that so-called burying beetles coat their young's food with an antibacterial substance to guarantee their survival. Burying beetles lay their eggs on the carcasses of small animals, such as birds and rodents. The researchers show that

without the anti-microbial secretions the young fail to gain weight and die. The results were presented the 13th Congress of the European Society for Evolutionary Biology. Most animals try to do the best for their young, but burying beetles, in the genus Nicrophorus, which are found in temperate regions in Europe and North America, are truly doting parents.

As a prospective parent, burying beetles find a dead animal, such as a mouse or bird, and roll the carcass into a ball.

Global governments 'must get tough on obesity'

LONDON, 27 Aug — Tougher action - including taxing junk food — is needed by all governments if the obesity crisis is going to be tackled, experts say. The international group of researchers, who have published a series of articles in *The Lancet*, said no country had yet to get to

grips with the problem.

They said changes in society meant it was getting harder for people to live healthy lives. And they warned without state action health systems could become swamped. Obesity-related problems, such as diabetes, were now accounting for between 2% and 6% of health care costs in most countries.

But as one of the articles showed this is likely to get worse if current trends continue. Researchers made projections for the US and the UK — two of the developed countries with the worst rates of obesity. They predicted obesity rates would rise from a quarter in the UK to about 40% by 2030. —Internet

Dog break-in scares 600 rabbits to death

Three dogs broke into a rabbit farm in a village in Zhejiang Province and scared 600 rabbits to death.

Yan Fugen, owner of the farm in Haixian village, found about 1,000 rabbits had died after three dogs broke into the farm on 7 Aug. He was surprised when he saw the nearly 600 rabbits that had died had no injuries on their bodies.

Chen Dongxiang, an expert with the local animal husbandry bureau, said the deaths were the result of the animals' stress response. When rabbits or other animals are scared by a severe noise or sudden surprise, their bodies secrete large amounts of adrenaline. Their sympathetic nervous system also enter into a state of excitation, causing their hearts to beat fast and their organs to function improperly. That can lead to death.

Chen said pheasants, like rabbits, can also be scared to death.

This photo taken on 25 Aug, 2011 shows a wall with graffiti art near Rio de Janeiro Botanical Garden in Rio de Janeiro, Brazil. The streets of Rio de Janeiro are marked by hundreds of graffiti art which has apparently become part of the everyday life. Jogger struck by hawk

A Missouri man who felt something hit the back of his head while he was jogging in the early morning said he believes he was attacked by a hawk.

Brian Foster, 29, an employee of KMBC-TV in Kansas City, said he was jogging at the corner of 147th Street and Metcalf Avenue about 5 a.m. Thursday when he felt something strike the back of his head, KMBC-TV reported.

Foster, who was not seriously injured, said he quickly turned around and spotted a bird he believes to be a hawk flying away.

KMBC said there have been several hawk sightings in the area and officials have warned residents of aggressive hawks attacking small pets.

Man returns to crime scene every year to repent

Mei Chunhui, 27, a resident of Wuhan, capital of Hubei Province, goes to the crime scene and also to places near the victim's home to repent and pay homage to the victim.

On the night of 24 Nov, 2001, Mei robbed a woman with his friends, Tan Jinming and Liu Shuai. After getting money and other property from the woman, the three men raped and killed her. The police later caught Tan and Liu, but Mei managed to escape.

On 9 Aug, the police received information that Mei had returned to Wuhan and caught him that afternoon. Mei told the police that he had fled to Anhui province and Beijing. From the woman's ID card, Mei learned the victim's address. He later began to go to places near the victim's home, as well as the scene of the crime, to repent and pay homage to her on 24 Nov every year.

Kelly Brook wants to marry boyfriend

LONDON, 27 Aug—Model-actress Kelly Brook says she would "love" to marry her boyfriend Thom Evans and start a family in the future.

Brook, who experienced a miscarriage in March, this year, would like to walk down the aisle with her rugby player boyfriend. However she is not in a rush and is focusing on being a "good girlfriend" for the moment.

"One day I'd love to have children and I'd love to be married but now I'm just focusing on working on staying healthy and fit and being a good girlfriend. That's my priority. When the time's right and if it happens, it happens," femalefirst.co.uk quoted the 31-year-old as saying.

"I won't be proposing to anyone anytime soon, put it that way," she added.—*Internet*

Gilbert files for divorce from Boxleitner

LOS ANGELES, 27 Aug—Former "Little House on the Prairie" star Melissa Gilbert has filed for divorce in Los Angeles from actor Bruce Boxleitner after 16 years of marriage.

Gilbert, 47, who played Laura Ingalls, also known as "Half Pint," during the entire run of the show from 1974-83, married Boxleitner in 1995.

Although California is a no-fault state, she

City can win the title, says new recruit Nasri

Manchester City's new signing, French midfielder Samir Nasri

LONDON, 27 Aug—Samir Nasri has said Manchester City will be the main challengers for Manchester United's Premier League title this season—and will prove he made the right decision to join them. The Frenchman dismissed suggestions a more lucrative contract was the reason behind his £24 mil-

lion (\$39 million, 27 million euro) move from Arsenal to City.

Nasri was also linked with United as he entered the final year of his contract, but said: "I can let people think what they want. Me, I know my choice and my choice is about football. "We will see at the end of the season when we will lift a trophy, we will talk about my choice again and we will show that everyone who was thinking about money that they were wrong. "I think City can win the title. It is the biggest challenge to Manchester United.—*Internet*

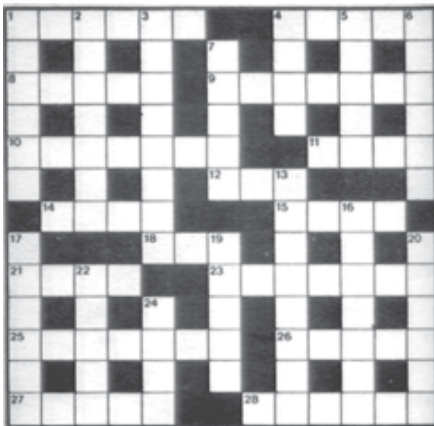

Pole vaulter Steve Hooker out of worlds

DAEGU, 27 Aug—Defending pole vault champion Steve Hooker is out of the world championships after failing to clear a height in qualifying on Saturday.

The Australian was long out with a left knee

injury this season and missed his three attempts at his opening height of 5.50 metres. Hooker also was injured two years ago at the world championships in Berlin but, in pain, he still won with a vault of 5.90.—*Internet*

Messi, Fabregas lift Barcelona to Super Cup win

MONACO, 27 Aug — Barcelona beat nine-man FC Porto 2-0 on Friday to win the European Super Cup behind goals by Lionel Messi and substitute Cesc Fabregas.

Messi, honoured on Thursday as the Best Player in Europe, struck in the 39th minute after collecting a misplaced backpass from Porto's Freddy Guarin.

Porto defender Ronaldo drew a second yellow card for tripping Messi minutes before Fabregas scored on a volley in the 88th minute. Guarin was then shown a straight red card for a challenge on Javier Mascherano. Pep Guardiola became the

most decorated coach in Barcelona's history with 12 trophies in just his fourth season.

Captain Fletcher makes Scotland Euro squad

LONDON, 27 Aug — Manchester United midfielder Darren Fletcher captains Scotland in their two Euro 2012 qualifiers next week, his first international appearance this year after he was sidelined by illness. Manager Craig Levein named Fletcher in his 25-man squad to face the Czech Republic on September 3 and Lithuania on September 6 in their bid to make the finals of the European tournament in Poland and Ukraine next year. Levein said Fletcher is "100 percent" fit and ready to play both matches.

player and a perfect role model and example to the rest of the guys in the squad." Scotland are fighting to win second place behind the Group I leaders, world and European champions Spain. Levein hailed Scotland's 2-1 friendly win over Denmark earlier this month as a sign of progress.

BARCLAYS PREMIER LEAGUE SPORTS

Wigan 2 - 0 QPR

Wigan extended their best start to a Premier League season to three unbeaten games as Franco Di Santo's brace gave them victory over QPR.

LONDON, 27 Aug—The Argentine volleyed home in the first half and found the top corner with a deflected drive in the second to give the Latics a deserved win. They didn't have it all their own way, though, as QPR's Adel Taarabt twice struck the same post in the first half.

draws with Norwich and Swansea. For the large part this was an intriguing contest between two closely matched sides. In a tame second-half performance, the visitors managed only a handful of meaningful efforts, the best of which Perone headed against the bar from a corner.—*Internet*

Bruno Perone also hit the woodwork from a second-half Taarabt corner. Wigan's victory brings a successful end to their early-season trilogy of games against the newly promoted sides, following

Aston Villa's Charles N'Zogbia races past Stephen Ward of Wolves.

Aston Villa 0-0 Wolverhampton Wanderers

LONDON, 27 Aug—Wolverhampton Wanderers survived a second-half battering from Aston Villa to remain unbeaten in the Barclays Premier

League in a hard-fought derby at Villa Park.

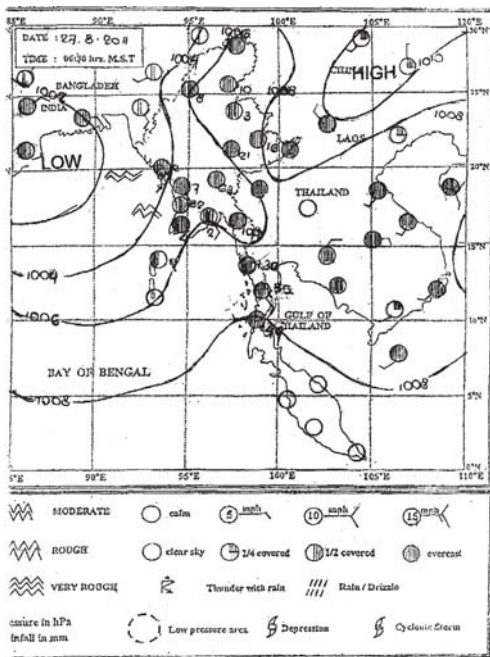

Mick McCarthy's side have now taken seven points from their opening three matches, although they were second best during the second 45 minutes.

Emmerson Boyce of Wigan Athletic is challenged by Fitz Hall.

Weather Map of Myanmar and Neighbouring Areas

Weather forecast for 28th August, 2011

| Sr. No. | Regions/States | Temperature (°C/F) | | For Tomorrow | |
|---------|--------------------------|--------------------|---------|--|---------|
| | | Maximum | Minimum | Forecast | Percent |
| 1 | Kachin | 33/91 | 24/75 | Fairly widespread rain or thundershowers | 100% |
| 2 | Kayah | 22/81 | 21/70 | Fairly widespread rain or thundershowers | 100% |
| 3 | Kayah | 31/88 | 23/73 | Widespread rain or thundershowers | 100% |
| 4 | Chin | 19/66 | 13/55 | Widespread rain or thundershowers | 100% |
| 5 | Upper Sagaing | 30/86 | 22/72 | Fairly widespread rain or thundershowers | 100% |
| 6 | Lower Sagaing | 28/82 | 23/73 | Fairly widespread rain or thundershowers | 100% |
| 7 | Tamithayi | 31/88 | 25/77 | Widespread rain or thundershowers (H) | 100% |
| 8 | Bago | 32/90 | 22/72 | Widespread rain or thundershowers | 100% |
| 9 | Magway | 31/88 | 26/79 | Fairly widespread rain or thundershowers (H) | 100% |
| 10 | Mandalay | 28/82 | 24/75 | Widespread rain or thundershowers (H) | 100% |
| 11 | Mon | 30/86 | 23/73 | Widespread rain or thundershowers (H) | 100% |
| 12 | Yangon | 32/90 | 23/73 | Widespread rain or thundershowers | 100% |
| 13 | Rakhine | 32/90 | 24/75 | Widespread rain or thundershowers (H) | 100% |
| 14 | Southern Shan | 22/72 | 18/64 | Fairly widespread rain or thundershowers | 100% |
| 15 | Northern Shan | 29/84 | 19/66 | Fairly widespread rain or thundershowers | 100% |
| 16 | Eastern Shan | 25/77 | 20/68 | Fairly widespread rain or thundershowers | 100% |
| 17 | Ayeyawady | 33/91 | 25/77 | Widespread rain or thundershowers | 100% |
| 18 | Neighbouring Nay Pyi Taw | 29/84 | 24/75 | One or two rain or thundershowers | 100% |
| 19 | Neighbouring Yangon | 32/90 | 23/73 | One or two rain or thundershowers | 100% |
| 20 | Neighbouring Mandalay | 28/82 | 24/75 | One or two rain or thundershowers | 100% |

During the past 24 hours, rain or thundershower have been fairly widespread Magway Region, Kachin and Shan States and widespread in the remaining Regions and States with regionally heavy falls in Lower Sagaing, Mandalay, Magway and Tamithayi Regions, Rakhine and Mon States. The noteworthy amounts of rainfall recorded were Nay Pyi Taw (Yezin) (4.13) inches, Lamung (8.15) inches, Kyaukse (7.27) inches, Ye (6.30) inches, Pakoku (5.64) inches, Dawei (5.47) inches, Kankarok (4.92) inches, Mawlamye (4.49) inches, Moulon (4.25) inches, Myingyan (3.23) inches, Kambala (1.57) inches and Chank (1.54) inches.

Bay Inference: Monsoon is strong in the Andaman Sea and South Bay and moderate elsewhere in the Bay of Bengal.

State of the Sea: Squalls with moderate to rough sea are likely at times Deletic, Gulf of Motma, off and along Mon-Tamithayi Coast. Surface wind speed in squalls may reach (35) mph. Seas will be moderate elsewhere in Myanmar waters.

Outlook for subsequent two days: Decrease of rain are likely in the Northern Myanmar areas.

Singapore's presidential candidate Tan Kin Lian concedes defeat

SINGAPORE, 27 Aug—Tan Kin Lian, one of the four presidential candidates, has conceded defeat in the election on Saturday. Tan Kin Lian conceded defeat after visiting three vote counting centers.

It will be a tough fight between the top two candidates, he said, declining to reveal who they were. The other three candidates are former deputy prime minister Tony Tan, former lawmaker Tan Cheng Bock and former senior civil servant Tan Jee Say. Tony Tan has been tipped to be the forerunner.

Most of the 2.27 million voters have cast their votes when the more than 780 polling stations were open from 8:00 am to 8:00 pm on Saturday. Vote counting is currently underway at 162 vote counting centers. Tan Kin Lian said he might not be able to get his deposit back, meaning that his share of the votes might be less than 12.5 percent of the total.

Roman Coppola (L) and Eleanor Coppola, (R) wife of filmmaker Francis Ford Coppola.

Sofia Coppola to wed in ancestral Italian town

ROME, 27 Aug—Filmmaker Sofia Coppola is going back to her roots, getting married Saturday in the remote, southern Italian town where her great-grandfather was born. Coppola is marrying Thomas Mars, lead singer of the French rock band Phoenix and the father of their two young daughters, in Bernalda, near the Gulf of Taranto in Italy's Basilicata region.

The ceremony will take place in the garden of a historic palazzo that her famous father, Francis Ford Coppola, has renovated in

Bernalda's historic center, according to mayor Leonardo Chiruzzi. The senior Coppola plans to turn it into a luxury boutique hotel. Bernalda, near the UNESCO-recognized troglodyte settlement of Matera to the north, was home to the elder Coppola's grandfather, Agostino, before he emigrated to the United States.

Chiruzzi, who is due to perform the civil ceremony, said the wedding would be simple but beautiful.

Contracts signed for extended installation of GSM

A signing ceremony to extend installation of GSM mobile phone lines in progress.

MNA

NAY PYI TAW, 27 Aug— The government is joining hands with the private sector in implementing GSM mobile phone extended installation project on a wider scale with the aim of developing socio-economic life of the people, ensuring rural development and poverty alleviation and giving smooth communication services to the people, said Union Minister for Communications, Posts and Telegraphs U Thein Tun at the ceremony to sign contracts for extended installation of GSM mobile phone lines at the ministry, here, yesterday.

Thein Oo of Myanma Posts and Telecommunications, private entrepreneurs of local companies and officials signed the contracts.

MPT and private companies will cooperate in implementing the GSM mobile phone extended installation project through mutual interest in giving mobile telephone services to the people across the nation at fair charges. They will strive for achieving success in their works within rules and frameworks adopted by the State. As such, the project is sure to contribute much to development of economic and social sectors of the State. Efficient use of telephone service will improve socio-economic life of the people. Moreover, development of communication sector will reflect all-round development of the nation.—MNA

The Union Minister noted that private entrepreneurs are to make utmost efforts for timely completion of the project to be able to give GSM mobile communication services to the people with goodwill.

General Manager U

MPT and private companies will cooperate in implementing the GSM mobile phone extended installation project through mutual interest in giving mobile telephone services to the people across the nation at fair charges.

Mata scores on debut as Chelsea beats Norwich

LONDON, 27 Aug—Juan Mata scored on his Chelsea debut to complete a 3-1 victory over Norwich in the Premier League on Saturday after

teammate Didier Drogba was stretchered off.

The new recruit from Valencia netted in the 11th minute of stoppage time, which resulted from Drogba requiring treatment on the pitch after being accidentally punched by Norwich goalkeeper John Ruddy.

Jose Bosingwa had put the Blues ahead after six minutes and Frank Lampard restored their lead from the penalty spot after Grant Holt's Norwich equalizer.

Also Saturday, Franco Di Santo scored twice as Wigan beat Queens Park Rangers 2-0, while Aston Villa and Wolverhampton Wanderers drew 0-0. Mikel Arteta's penalty gave Everton a 1-0 win at Blackburn, which failed to score from two penalties.—Internet

Gunners triumph in table tennis

Arsenal won the Premier League 4 Sport London Table Tennis Cup 2011.

LONDON, 27 Aug—Arsenal in the Community have won the Premier League 4 Sport (PL4S) London Table Tennis Cup 2011.

Held at the established Ellenborough Table Tennis Club in Enfield, the inaugural competition saw the Gunners compete against the Chelsea Foundation, West Ham United Community Sports Trust and Tottenham Hotspur Foundation for the right to be crowned London champions.

For some of the youngsters involved, it was their first-ever table tennis tournament, while for other more experienced players, it offered a chance to test themselves against their peers from other clubs. The 10 Arsenal players combined youngsters from no fewer than six different schools, who come together each week for training at the new Arsenal Community Table Tennis Club at St Aloysius College in Islington.—Internet

Nadal seeks to put brakes on streamrolling Djokovic in US Open final

NEW YORK, 27 Aug — Although Rafael Nadal of Spain arrives at the US Open as the defending champion, he knows he won't be the favorite for this year's men's singles title.

Since losing his No 1 ranking and the Wimbledon final to Djokovic, Nadal, now second, has been resting and preparing himself mentally and physically to avenge five straight defeats to the big-hitting Serb.

His uncle and coach, Toni Nadal, acknowledged it won't be easy.

"It's a big challenge. It's a big problem," Nadal said.—
