Promote public health care

Every citizen needs to be strong and healthy and enjoy longevity. Placing emphasis on public health, the Ministry of Health is enhancing up health care in all parts of the country, including rural and border areas.

At present, Shan State (North) has one 200-bed hospital, two 150-bed hospitals, three 100-bed hospitals, four 50-bed hospitals, ten 25-bed township hospitals and 39 16-bed hospitals totalling 59 to provide adequate public health care.

The number of rural health centres touched 39 in 1988 and it reaches 65 in 2010. They are taking extensive measures for disease prevention and treatment, environmental sanitation and health education.

Namhsan Township People's Hospital (50-bed) in Kyaukse District, Shan State (North) was opened on 7 April. The hospital is complete with the medical ward, operation theatre, maternal ward, children's ward and Sangha ward. At the hospital, a medical team led by the eye specialist from No.2 Military Hospital gave free treatment to eye patients and provided glasses and medicines.

The State has extended construction of hospitals and dispensaries all over the country and appointed more doctors and health staff in order that they may provide health care to the public intensively. All in all, the cooperative efforts of the State, public wellwishers, health staff and regional bodies have contributed to the promotion of public health care.

Workshop on Reducing Emissions from Deforestation and Forest Degradation-REDD held

NAY PYI TAW, 8 April—Workshop on Reducing Emissions from Deforestation and Forest Degradation-REDD jointly conducted by Forest Department of the Ministry of Forestry and UNDP took place at the Forest Department (Head Office) here this morning with an opening address by Director-General U San Lwin of Planning and Statistics Department.

Deputy Director-General U Kyaw Tun of PSD presided over the morning session of the workshop while Assistant Director Dr Thauang Naing Oo of Forest Department presented paper on forest resources, forest management system and

enabling conditions for REDD in Myanmar, Deputy Director U Ohn Lwin on role of forestry sector in climate mitigation through REDD, Dr Min Htut Yin UNDP on how to link CF practices and REDD and UNDP Coordinator Mr

Tim Boyle paper on procedure and potential implications: How to link with UN-REDD

Programme and they held discussions with those present.

People's Desire

- * Oppose those relying on external elements, acting as stooges, holding negative views
- * Oppose those trying to jeopardize stability of the State and progress of the nation
- * Oppose foreign nations interfering in internal affairs of the State
- * Crush all internal and external destructive elements as the common enemy

Teak, hardwood plantations thriving in Ayeyawady Div, Rakhine State

NAY PYI TAW, 8 April—Minister for Forestry Brig-Gen Thein Aung on 3 April morning looked into functions of No 106 Saw Mill in Thida Konpyin Village, Yekyi Township, Ayeyawady Division, storing of sawn timbers and systematic placing of logs at Malakwin timber depot.

At the briefing hall of Gwa Township Forest Plantation in Rakhine State, the minister heard a report on thriving 150 acre-ironwood plantations, 50-acre teak plantations and 100-acre teak plantations and 100-acre Pyinkado plantations and inspected the plantations.

At the briefing hall of Daung Chaung Jetty of Thandwe Timber Extraction Region, the minister heard a report presented by officials on arrival of logs and matters related to timber extraction and viewed making systematic marks on logs.

On 4 April morning, the minister heard a report on growing of 3020 eucalyptus and 453 teaks by Director U Aung Myat Thein of Rakhine State Forest Department at Nyaung Chaung Village in Gwa Township and gave necessary instructions.

Appointment of Algerian Ambassador agreed on

NAY PYI TAW, 9 April—The Government of the Union of Myanmar has agreed to the proposed appointment of Mr. Cherif Chikhi as Ambassador Extraordinary and Plenipotentiary of the People's Democratic Republic of Algeria to the Union of Myanmar.

H.E. Mr. Cherif Chikhi was born on 15 December 1951. He graduated from the National Institute of Administration in 1976. He joined the Ministry of Foreign Affairs in 1976 and worked there in various capacities. He served in the Embassy of the People's Democratic Republic of Algeria in Mozambique as First Secretary from 1981 to 1984. He was Minister Counsellor in the Algeria Embassy in London from 1993 to 1995. From 1997 to 2004, he was appointed as Ambassador of the People's Democratic Republic of Algeria to Ukraine. He has been serving as Ambassador Extraordinary and Plenipotentiary of the People's Democratic Republic of Algeria to the Socialist Republic of Vietnam since 2008.

H.E. Mr. Cherif Chikhi will be concurrently accredited as Ambassador of the People's Democratic Republic of Algeria to the Union of Myanmar with residence in Hanoi. He is married with five children.

Taleban releases video of US soldier

WASHINGTON, 8 April —The Taleban has released a new video of US soldier Bowe

Bergdahl captured last year in Afghanistan, calling for his exchange for Taleban prisoners, the IntelCenter monitoring service said Thursday.

The nearly eight-minute-long video showed Bergdahl, in a

beard and wearing an army jacket, reading a newspaper and doing pushups, the service said.

Taleban spokesman Zabihullah Mujahid is heard at the end of the video making a statement, with English subtitles, reiterating Taleban demands for the release “a limited number of prisoners in exchange for this American prisoner.”

“Unfortunately, the arrogant American rulers are not ready to take any step in this regard,” it said, according to IntelCenter.—Internet

Afghan police arrested the five would-be suicide bombers Thursday in Kabul — the largest suicide bomb team ever apprehended in the capital, officials said.—INTERNET

Militants bomb three girls' schools in Pakistan

ISLAMABAD, 8 April— Militants bombed three girls' schools on the outskirts of Pakistan's city of Peshawar, the latest in a wave of Islamist attacks on educational institutions, a provincial minister said Thursday.

Nobody was hurt in the pre-dawn attacks in the northwestern capital, the gateway to Pakistan's troubled tribal regions, where the military is battling Taliban and Al-Qaeda-linked militants.

“Militants damaged a girls' high school, a primary and a middle school, on the outskirts by planting explosive material,” provincial education minister Sardar Hussain Babak said.

He blamed the attacks on the Taleban. “The militants, who are on the run in the wake of military offensives against them were targeting schools to create panic,” he said.—Internet

Bombing of NATO tanker in Pakistan kills boy

PESHAWAR, 8 April — A bomb attached to a tanker carrying fuel to NATO forces in Afghanistan exploded in northwestern Pakistan on Wednesday, destroying the vehicle and killing a boy who was riding in a van behind it.

The blast occurred when the tanker was just 4 miles (6 kilometers) from the Afghan border in the Khyber tribal

area, said local administrator Iqbal Khan. The explosion wounded four other passengers in the van, he said.

Afghan-based US and NATO forces get up to 75 percent of their supplies via routes through Pakistan. Taleban militants have frequently targeted the convoys, although attacks have declined in the last few months.

Obama, Medvedev sign treaty to cut nuclear arms

PRAGUE, 8 April — Seeking to end years of rancor, President Barack Obama and Russian President Dmitry Medvedev on Thursday signed the biggest nuclear arms pact in a generation and envisioned a day when they can compromise on the divisive issue of missile defense.

The new treaty, the first of its kind in two decades and nearly a year in the making, signaled a bold new opening in relations between the former Cold War foes. Both leaders hoped for more progress on economic

matters and potentially even deeper cuts in their robust nuclear arsenals, while the Russian president still warned of potential pitfalls ahead.

The pact will shrink the limit of nuclear warheads to 1,550 per country over seven years. That still allows for mutual destruction several times over. But it is intended to send a strong signal that Russia and the US—which between them own more than 90 percent of the world's nuclear weapons — are serious about disarmament.

“Today is an impor-

tant milestone for nuclear security and nonproliferation, and for US-Russia relations,” Obama said. Medvedev hailed the signing as a historic event that would launch a new chapter of cooperation between the countries.

Electric cars to get a lift up in China from new policy measures

BEIJING, 8 April — Chinese automakers are set to benefit from a much-awaited government stimulus plan that encourages production of fuel-efficient vehicles, said industry sources.

The green auto plan, currently awaiting government approval, is expected by industry players to be unveiled in the next couple of months. According to the plan, electric cars

that qualify for subsidies are those that have received government's production license and are assembled in China, regardless of whether made by domestic or joint-venture firms.

The industry sources said that imported electric cars would have little hope of benefiting from the policy in the initial stages.

Private buyers in five chosen cities could

obtain incentives, with potential limits of up to about 60,000 yuan (8,788 US dollars) or 50,000 yuan per car.

Miao Wei, vice-minister of the Ministry of Industry and Information Technology has said the government planned to launch the incentives for private purchases of new energy vehicles in March. However, the plan has since been postponed.

TV drama "Big girl should get married" hot now

BEIJING, 8 April — The Chinese TV series "Big Girl Should Get Married" ("Da Nv Dang Jia") is in full swing on CCTV-8, China Central Television's drama channel. Song Jia appears in the leading role.

Nowadays, the idea that "a girl should get married when she comes of age" has become a hot topic in China's cities, and is stirring up debate among Internet users.

The TV show deals with this social issue, portraying parents who urge their daughter to get married whether or not she has met her Mr. Right. The plot has given

audiences, and unmarried women in particular, a great deal to think about.

In the drama, Jiang Dayan (Song Jia) is the eldest daughter in the family. She is also the only unmarried sibling, her younger brother and sister having married in quick succession.

Facing pressure from her parents, she goes on a blind date. The question of whether she should meet her parents' wishes and fulfill the traditional requirements of society, or chase after her own happiness, is at the heart of the show.

Boy, 11, gives \$14,649 to drought relief

BEIJING, 8 April — An 11-year-old boy has donated his New Year gift money of 100,000 yuan (US\$14,649) to help the victims of drought-ravaged Southwest China, Youth Times reported.

Zhang Beiyuan from Shaoxing, East China's Zhejiang province, received approximately 9,000 yuan each year during the Spring Festival, China's lunar New Year, to save for a university education.

But after hearing of the plight of those suffering in the drought, he handed over his 11-year savings to a fund established for relief efforts.

His parents support the boy's decision although they feel surprised by his generosity.

His teacher Zhong Caijuan said that Zhang is a very nice boy who loves animals and is always ready to help others.

Xinhua

British economy may face slow recovery

LONDON, 8 April — British economic growth slowed in the first quarter of this year to 0.2 percent, down from an official figure of 0.4 percent for the previous quarter, the British Chambers of Commerce (BCC) said in its latest survey Wednesday.

The BCC questioned 5,500 businesses

to make the survey, which showed that the manufacturing sector was suffering, while the services sector had improved.

According to the survey, manufacturing employment was down to -16 on the BCC's gauge for the first quarter from +3 in late 2009. Key indicators like investment and

cash flow remained negative. However, manufacturing exports were up 4 points to +21.

In the services sector, growth was seen in both sales and orders, although both services and manufacturing sectors showed negative indicators in investment in plant and machinery as well as cash flow.

Death toll of landslide in Peru rises to 28

LIMA, 8 April—The death toll of the landslide in the Peruvian Amazon region rose to 28, the Peruvian National Institute of Civil Defense (Indeci) said on Tuesday. The Indeci said that the landslide occurred on 1 April and affected five towns, leaving 42 people missing, 54 injured. It also destroyed 200 houses.

From January to March, the Indeci registered 80 deaths, 26,000 victims, 7,700 destroyed houses and 18 damaged schools in Ambo district in the province of Huanuco, which has been affected by continuous natural disasters. The heavy rains last week produced a landslide in Yanacocha Hill, 584 inhabitants were evacuated. According to the experts, the deforestation and the invasion of land is a high risk factor to cause these disasters every year.—Internet

Death toll of Mexicali's earthquake rises to four

MEXICO CITY, 8 April—The number of deaths rose to four for the earthquake of 7.2 magnitude that shock Baja California, Mexico on Sunday afternoon, the Mexican National Defence Ministry (Sedena) said on Tuesday.

The Sedena said in a statement that "to the moment there have been recorded four deaths and 100 injured without grave complications." The Sedena said that the DN III plan has been applied in the cities of Mexicali, Tijuana, Tecate and San Quintin to provide aid during natural disasters.

The Sedena also stressed the coordinated work with the local organizations of Civil Protection, which includes patrolling, aid to the civilians and evacuations from the places in risk.—Internet

Death toll rises to 40 in central China mine blast

YICHUAN, 8 April—The death toll after a central China mine blast last week has risen to 40, with 6 still missing, local authorities said on Tuesday.

An official with the rescue headquarters confirmed Tuesday that 98 people were working underground in the Guomin coal mine in Yichuan county when the blast occurred at 7:20 p.m. on 31 March. 57 were lifted to the ground unharmed, 35 were killed and six are still missing.

The explosion also killed five and injured one on the ground, the official said.

The illegal coal mine owned by village head Wang Guozheng was poorly managed and even

Rio's worst rains in history kill at least 95

RIO DE JANEIRO, 8 April—The heaviest rains in Rio de Janeiro's history triggered landslides Tuesday that killed at least 95 people as rising water turned roads into rivers and paralyzed Brazil's second-largest city.

The ground gave way in steep hillside slums, cutting red-brown paths of destruction through shantytowns. Concrete and wooden homes were crushed and hurtled downhill, only to bury other structures.

The future host city of the Olympics and football World Cup ground to a near halt as Mayor Eduardo Paes urged workers to stay home and closed all schools. Most businesses were shut.

Eleven inches (29 centimeters) of rain fell in less than 24 hours, and more rain was expected. Officials

said potential mudslides threatened at least 10,000 homes in the city of 6 million people.

Gunmen attack Mexican army housing, two troops hurt

MEXICO CITY, 8 April—Suspected cartel gunmen wounded two soldiers in an unprecedented grenade attack on army housing in northern Mexico, the latest sign that drug gangs are increasingly turning to open warfare tactics against the military.

The gunmen fired the

grenade from a rifle at a camp where soldiers live with their families outside the Gulf coast city of Tampico, the Defense Department said in a statement Tuesday. The two wounded soldiers were treated, but none of their relatives was harmed in the attack Monday. The Defense Department reiterated its stance that cartels are acting out of desperation in the face of army successes in the drug war. "Members of organized crime staged a cowardly attack with a rifle-fired grenade," the department said. "These types of aggressions demonstrate that the structure of organized crime has been eroded, provoking desperate acts like attacking families of the armed forces." Soldiers pursued the assailants but only found their abandoned car, with five guns and a grenade inside, the statement said.

Army positions have repeatedly come under attack in recent weeks in the northwestern states of Tamaulipas and Nuevo Leon, which border Texas.

Whitney Houston postpones more European tour dates

NEW YORK, 8 April— Whitney Houston has again pushed back the European leg of her first tour in years on the advice of doctors who are encouraging her to take time to recover from a respiratory illness, according to a statement issued Wednesday.

Houston had already postponed the European kickoff, originally scheduled for Tuesday in Paris, because of illness. A statement from a representative said doctors advised Houston to reschedule concerts Thursday and Friday in Manchester, England, and a Sunday performance in Glasgow, Scotland.

All dates are being rescheduled, and the 46-year-old singer's tour is now supposed to start next Tuesday in Birmingham, England.—*Internet*

Antique beadwork revived in S Africa ahead of W Cup

PORT ELIZABETH, 8 April—Carefully sliding a red bead onto her needle, Nocawa Carow Vuso slips it down her string and affixes to the “keeper of my heart”, a replica of an antique South African necklace. It's one of the old South African styles on display for the World Cup in Port Elizabeth, a city better known for its car factories than its fashion, and set to be a desperately-needed money-spinner when the June 11-July 11 football showpiece takes place.

The beaded

necklace originally would have been made for a man by his wife. Now women like Vuso are relearning the forgotten patterns, and sometimes replacing traditional designs with football themes.

“It's the first time I'm working on old patterns,” she said. “I'm going back to my roots. I can do what my grandmothers were making in rural areas.”

With other women from the city's townships and from the Nomakwesi craft centre where she works, Vuso will exhibit her glass beads at the Nelson Mandela Metropolitan Art Museum.

Lizard with two penises found in Philippines

Scientists have found a new species of lizard that lives in the trees on the northern Philippines island of Luzon, according to media reports on Wednesday.

Dubbed *Varanus bitatawa*, the dragon-sized, fruit-eating lizard measures 6 feet 6 inches (about 2 meters) in length, but only about 22 pounds (about 10 kg) in weight, and the creature is endowed with a double penis, according to the study published in the British Royal Society Journal Biology Letters.

“It lives up in trees, so it can't get as massive as the Komodo dragon, a huge thing that eats large amounts of fresh meat,” said Rafe Brown of the University of Kansas, whose team confirmed the find. “This thing is a fruit-eater and it's only the third fruit-eating lizard in the world.”

However, how many of the lizards have survived is unclear.

A Varanus bitatawa, pictured in 2009 in the Philippines. Scientists reported on the “spectacular” discovery a previously unknown species of fruit-eating lizard as big as a full-grown man.

“Don't be shy! Say hello to the world!”

Surprises abound in the journey of life. And the beginning is especially wonderful. Knock, knock — the shell cracks; then a naughty, curious miniature gets out from the broken egg, making its appearance in the world for the very first time.

Following sets of pictures show the young of four different species hatching from their eggs.

These extraordinary photos are created by the couple team Heidi and Hans-Juergen Koch from Germany (who have specialized in animal photography for the past 20 years). Let's say hello to those fascinating little lives!

Regional development tasks in Htantabin, Twantay Townships in leaps and bounds

TMW Enterprise welcomes Thingyan with sale promotion

YANGON, 8 April—The news crew observed SONY Days Promotion 2010 being held at TMW Enterprise SONY Show Rooms on Pansodan and Kaba Aye Pagoda Roads here from 6 March to 9 April and LG-Festival 2010 at LG-Show Room on Sule Pagoda Road here.

A responsible person of SONY Show Room on Kaba Aye Pagoda Road explained to us, "SONY is selling BRAVIA, LCD and LED Televisions with discount in this promotion period and cameras with memory cards as gifts. Another noteworthy event is to introduce TX5 water-resistant cameras ahead of Thingyan (Water Festival). The camera has water resistance for 60 minutes and sand and dust resistance. It is safe even if it falls from 5-ft height."

At LG-Festival at LG Show Room on Sule Pagoda Road, a responsible staff said, "We celebrates LG-Festival 2010 from 6 March to 9 June. In the promotion period of LG, LCD and Plasma TVs, DVDs, Home Theatres, washing machines, air conditioners, refrigerators, microwave ovens, vacuum cleaning with special prices and gifts.

"As a special programme for this year Thingyan, LG air conditioners (Split Type) are selling with frame and safeguard gifts and free installation service is also being provided from 1 to 9 April."

In an interview, an official of T-Home Brand told us, "We have planned to organize free vacation to Bali Island of Indonesia for the sale

SONY Days Promotion 2010 in progress.—MNA

representatives who buy TV-Brand TVs, LCDs, water dispensers and freezers for K 18 million. Music VCDs of Thingyan songs to be distributed by T-Home are gifts to buyers of any item of T-Home Brand.

"T-Home Thingyan Pandal is being built in front of Sedona Hotel and Mya Kyun Tha Garden. The singers will entertain with Century and Cobra H music bands and T-Home Thingyan songs album will be produced as in the last year."

Not only SONY branded electronics but also I max branded tiles and bathing accessories can be bought during the SONY Days Promotion 2010.

Freight-handling at jetties inspected

Transport Minister Maj-Gen Thein Swe looks into freight-handling at No. 5 Sule jetty.

MNA

NAY PYI TAW, 8 April — Chairman of the Committee for Ensuring Speedy and Regular Freight-handling and Op-

erating in Full Capacity Minister for Transport Maj-Gen Thein Swe inspected examining of import and export products, storage of the goods in the warehouse, monitoring of container trucks with X-ray machine at the container yard of No.3 Bo Aung Kyaw Jetty on 5 April. During the inspection, he stressed the need for ensuring systematic monitoring of the goods and speedy and regular freight-handling and avoiding malpractices.

Next, the minister and party inspected unloading of goods from the

vessel at Sule No.5 Jetty. Then, they went to Asia World Port on Strand Road in Ahlon and looked into examining of import and export products, load-

ing and unloading of goods, monitoring of container trucks with X-ray machine and left necessary instructions.

Sailors stranded in Senegal to arrive back with assistance of Myanmar Seafarers Association

NAY PYI TAW, 8 April — Myanmar Seafarers Association is cooperating with international bodies and overseas seafarers associations in seafaring affairs in order to protect entitlements and privileges of sailors.

Three Myanmar sailors were stranded in Senegal as they were not paid their salaries and plane tickets were not arranged for them. But, they will be sent back to Yangon at 6.45 pm on 14 April with the assistance of Myanmar Seafarers Association.—MNA

Chaungtha Village of Patheingyi Township with progress and prosperity

Article & Photos: Tin Win Lay (Kyimyindine)

U Khin Maung Latt, Lobster Brokerage.

(from page 16)

He continued to say, "In the past, the region had lagged behind in development. The road will contribute much toward smooth transport and speedy flow of commodity at any time. So, the local people thank the government for its endeavours."

We proceeded to Ward No. 6 of the re-

gion. We all stopped in front of the newly-built Basic Education Primary School. Manager U Aye Thwin of ChaungthaU Hotel said, "The school was built with the contributions of Chaungtha Zone Hoteliers Association. It was opened on 11 June 2009."

The school is located on five acres of land. It is an RC one-storey build-

ing with five classrooms. In the school compound, there one play ground, two wells and one latrine.

Khaing Chaungtha Hotel Manager U Kyaw Hoe explained, "Our association is participating in development of the hotel zone and its surrounding villages. We donated K 30.9 million to construction of the primary school and computer and accessories to Village BEHS. We also donated one coloured TV set and five cassettees each to villages of Ayeyawady Division."

Chaungtha Village-tract has one BEHS, one BEHS (Branch) and seven BEPSs.

At Chaungtha Lake No. 2, Manager U Nyi Aung of Hotel Max who was supervising construction of the spillway ex-

A new road linking Chaungtha Hotel Zone and Shwethaungyan.

plained, "Chaungtha area has one 60-million-gallon lake and one 10-million-gallon lake. No. 1 lake is supplying drinking water to the rural people and the No. 2 lake is providing

water to the hotel zone. As such, not only the rural people and the visitors at the beach can use the water sufficiently yearly."

We saw a communication tower. At the auto-exchange, we were welcomed by in-charge of the exchange U Myint Swe. It was a magnet exchange in the past, and it was upgraded to an auto-exchange on 31 October 2005.

During the visit, we witnessed trawlers at the jetty. The region was busy with trading of fish, prawn and crab. We also visited a prawn brokerage and observed breeding of lobsters and prawns at the ponds.

While in the region,

we strolled along Uto Bridge. The bridge is an important facility in Patheingyi Township. The Bridge Construction Special Group No. 13 of Public Works built the bridge in 1997 and put it into service on 30 January 2000. In the time of Tatmadaw Government, the development gap between rural and urban regions is narrower and narrower day by day in the education, health, communication and social sectors. Nowadays, development in all aspects can be seen in all the regions including Chaungtha Village-tract of Patheingyi Township.

Jets scrambled over United Airlines bomb panic

WASHINGTON, 8 April — A DIPLOMAT who sparked a scare about a “shoe bomb” on a United Airlines flight from Washington to Denver had been smoking in a restroom and put out a cigarette on the sole of his sandals.

US air marshals confronted the man after flight attendants noticed smoke coming from the toilets.

When they asked him what he was

doing, he allegedly told them: “I’m lighting my shoes on fire.”

The man, identified as Mohammed al Modadi, was restrained until the plane landed at Denver, where he was taken into custody.

Following an investigation, authorities did not find any explosives and a US security official said, the diplomat’s statement may have been “sarcastic”.

“It may have been a massive misunde-

rstanding,” the official said.

Two F-16 fighters were dispatched to intercept the Denver-bound aircraft at about 6:45pm (local time), 10.45am (AEDT), according to a statement from the North American Aerospace Defence Command.

The flight, carrying 157 passengers and six crew, landed safely in Denver about five minutes later.

Google unveils car-dock for Nexus One

BEIJING, 8 April — Google is now stocking car docks for its Nexus One “superphone,” thus enabling users to easily mount the device in vehicles. It will better allow owners of the Nexus One to make use of Google’s turn-by-turn navigation facility and use it as one would a satellite navigation

device.

Although the Nexus One has yet to go on sale outside the United States, Google is keen to push the benefits of its HTC built smartphone. The Nexus One: Car Dock has built in speakers and volume controls to add a little volume and control to the driver. It

also comes with the Car Home app which loads automatically. The additional software provides an interface with five large buttons that make access to Maps, Navigation, Voice Search, Contacts, and Search easier while on the move.

Internet

Media attending the unveiling of the Nexus One smartphone, using the Android platform, watch an application on the first mobile phone the internet company will sell directly to consumers, during a news conference at Google headquarters in Mountain View, California on 5 January, 2010.

Astronomers take close-up pictures of mysterious dark object

Using an instrument created at the University of Michigan, astronomers have for the first time imaged a peculiar binary star eclipse that happens once every 27 years.—INTERNET

SCIENCE DAILY, 8 April— For the first time, astronomers have directly observed the mysterious dark companion in a binary star system that has puzzled skywatchers since the 19th century

Using an instrument developed at the University of Michigan, scientists have taken

close-up pictures of Epsilon Aurigae during its eclipse, which happens every 27 years. “Close up” in this case is a relative term, but the images zoom in enough to show the shape of the dark object’s shadow.

“Seeing is believing,” said John Monnier, an associate professor in the U-M

Department of Astronomy who is an author of a paper about the research findings published in the April 8 edition of *Nature*. Researchers from the University of Denver and Georgia State University were involved as well.

Epsilon Aurigae is the fifth brightest star in the northern constellation Auriga. For more than 175 years, astronomers have known it is dimmer than it should be, given its mass. They also noticed its brightness dip for more than a year every few decades. They surmised that it was a binary system in which one companion was invisible.

Vietnam expects more investment from Brunei

HANOI, 8 April— Vietnamese President Nguyen Minh Triet said here on Wednesday that Vietnam hoped to receive more investment from Brunei.

Triet made the remarks when meeting with Brunei’s Sultan Hassanah Bolkiah who arrived in Vietnam’s capital city of Hanoi for attending the 16th Summit of the Association of South-East Asian Nations

(ASEAN).

Speaking at the meeting, Triet thanked Brunei for supporting Vietnam in the regional and international forum, training human resources and receiving Vietnamese labours to work in Brunei.

Vietnam and Brunei share a lot of common interests which act as favourable premises for closer cooperation between the two countries, said Triet.

Triet appreciated Brunei’s experience in development of aquaculture industry and expected to see further aquaculture cooperation between Vietnam and Brunei in the near future. Brunei will continue to provide scholarships to Vietnamese students and help Vietnam train human resources in the areas of its strength, said Hassanah.

“New human-like species” revealed

JOHANNESBURG, 8 April—The remarkable remains of two ancient human-like creatures (hominids) have been found in South Africa.

The fossils of a female adult and a juvenile male - perhaps mother and son - are just under two million years old.

They were uncovered in cave deposits near Malapa in the Cradle of Humankind World Heritage Site near Johannesburg.

The team behind the discovery

reports in the journal *Science* that the new species should be assigned the name *Australopithecus sediba*.

Its mosaic of features, the researchers believe, means it fills an important gap between older hominids and the group of more modern species known as *Homo*, which includes our own kind.

The name “sediba” means “fountain” or “wellspring” in the Sesotho language spoken in South Africa.

Internet

A big-eared bat of the genus *Micronycteris*. Bats of this genus are found in Mexican coffee plantations, where they glean insects from foliage and help limit pest populations.

Bats play a major role in plant protection

SCIENCE DAILY, 8 April — If you get a chance to sip some shade-grown Mexican organic coffee, please pause a moment to thank

the bats that helped make it possible. At Mexican organic coffee plantations, where pesticides are banned, bats and birds work night and day to control insect pests that might otherwise munch the crop

Until now, the birds got nearly all the credit. But a new study from University of Michigan researchers shows that during the summer wet season, bats devour more bugs than the birds at Finca Irlanda, a 740-acre organic coffee plantation in Chiapas, Mexico.

And they often do it using a “perch and wait” hunting technique that is proving to be far more common than bat researchers had believed. A report on the study appears in the journal *Science* 4 April, 2008.

Computer program allows car to stay in its lane without human control

SCIENCE DAILY, 8 April—Researchers from North Carolina State University have created a computer program that allows a car to stay in its lane without human control, opening the door to the development of new automobile safety features and military applications that could save lives.

We develop computer vision programs, which allow a computer to understand what a video camera is looking at — whether it is a stop sign or a pedestrian. For example, this particular program is designed to allow a computer to keep a car within a lane on a highway, because we plan to use the program to drive a car,” says Dr. Wesley Snyder, a professor of electrical and computer engineering at NC State and co-author of a paper describing the research. “Although there are some vision systems out there already that can do lane finding, our program maintains an awareness

Researchers have written a program that uses algorithms to sort visual data and make decisions related to finding the lanes of a road, detecting how those lanes change as a car is moving, and controlling the car to stay in the correct lane.—INTERNET

of multiple lanes and traffic in those lanes.”

Internet

Our universe at home within a larger universe? So suggests physicist's wormhole research

SCIENCE DAILY, 8 April—Could our universe be located within the interior of a wormhole which itself is part of a black hole that lies within a much larger universe?

Such a scenario in which the universe is born from inside a wormhole (also called an Einstein-Rosen Bridge) is suggested in a paper from Indiana University theoretical physicist Nikodem Poplawski in *Physics Letters B*. The final version of the paper was available online 29 March and will be published in the journal edition 12 April.

Einstein-Rosen bridges like the one visualized above have never been observed in nature.

INTERNET

Poplawski takes advantage of the Euclidean-based coordinate system called isotropic coordinates to describe the gravitational field of a black hole and to model the radial geodesic motion of a massive particle into a black hole.

In studying the radial motion through the event horizon (a black hole's boundary) of two different types of black holes — Schwarzschild and Einstein-Rosen, both of which are mathematically legitimate solutions of general relativity — Poplawski admits that only experiment or observation can reveal the motion of a particle falling into an actual black hole. But he also notes that since observers can only see the outside of the black hole, the interior cannot be observed unless an observer enters or resides within.

Black breast cancer gap not due to therapy

WASHINGTON, 8 April—African-American women have worse breast cancer survival rates than others regardless of whether they received radiation therapy, US researchers said.

Steve Martinez, assistant professor of surgery at the University of California, Davis, Cancer Centre, found in one study that Hispanic patients were 20 percent less likely to get radiation therapy than their white counterparts and African-American patients were about 24 percent less likely to receive radiation therapy.

However, in a second study, Martinez examined 10-year survival rates in patients from whites, blacks and Hispanics.

The study found white women who had radiation therapy had an 11 percent survival boost, while black patients had only a 3 percent difference in survival rates.—Internet

Experts predict active hurricane season

FORT COLLINS, 8 April—Colorado State University experts say the 2010 hurricane season will be an active one, with elevated sea surface temperatures and a weakening El Nino condition.

The university's Tropical Meteorology Project is forecasting 15 named tropical storms, and says eight will become hurricanes with sustained wind speeds above 74 mph, the university announced on Wednesday. Four of those are predicted to become Category 3, 4 or 5 major hurricanes with maximum wind speeds of 111 mph or greater. Since 1950, the average Atlantic hurricane season has had 10 named storms, with six hurricanes, two of them major, the Project said.—Internet

Ancient shipwreck rescued on Outer Banks

CURRITUCK, 8 April—
The remains of a ship
wrecked on the Outer
Banks of North Carolina
300 years ago and plun-
dered by local residents
has been salvaged from
the sand.

Archaeologists said the
vessel likely is the HMS
Swift of the British Navy,
which ran aground in
Chesapeake Bay in 1698,
The Virginian-Pilot re-
ports. After the crew aban-
doned the ship, it drifted to
the Outer Banks, where
the locals, known as bank-
ers, cut a hole in the bot-
tom to keep it in place and
then removed everything
valuable.

The wreck, one of about
5,000 known on the Outer
Banks, could be the oldest
of the lot, said Richard
Lawrence, head of the
North Carolina Underwa-
ter Archaeology Branch.
Parts of the wreck have
been visible at least since
the mid-1990s.

as the teams build up to the World Cup.

Although both sides fielded only their domestic league players, the result piles more pressure on Japan boss Takeshi Okada, two months before the big kick-off in South Africa.

The Serbians were dangerous from the off, when midfielder Radosav Petrovic played in Mrda, who beat three defenders before firing a sizzling shot to open the scoring in the 15th minute after hitting the post with an earlier attempt.

Mrda put Serbia two up in the 23rd minute, quickly collecting a rebound off Japanese goalkeeper Seigo Narazaki before striking home.—Internet

Bordeaux, Lyon keep eyes on league prizes

BORDEAUX, 8 April — Bordeaux quickly turned their thoughts to pressing domestic matters after going down 3-2 on aggregate against Lyon in the Champions League quarter-finals.

Laurent Blanc's side crashed out of Europe's top club competition despite a 1-0 second-leg victory here on Wednesday but did at least manage to end a string of three consecutive defeats, the team's worst run since January 2004.

Saturday's surprise 2-1 defeat at home to Nancy saw the defending champions slip from the Ligue 1 summit as what was once a nine-point lead was finally whittled down to nothing.—Internet

Bordeaux's Jussie vies with Lyon's Michel Bastos (left) during their Champions League quarter-final match at the Chaban Delmas stadium in Bordeaux. Lyon reached the semi-finals for the first time in their history despite losing 1-0 to Bordeaux.

Rangers cruise to title continues with victory over Dons

GLASGOW, 8 April, — Rangers seemingly unstoppable march to retaining the Scottish Premier League title continued on Wednesday with a comfortable 3-1 win over Aberdeen at Ibrox.

The win takes Rangers 13 points clear of Celtic with just six games and they could clinch the title at Tannadice next Wednesday if their rivals slip up against Motherwell on Tuesday.

Rangers manager Walter Smith was happy to move closer to what would be a 53rd league championship for the club.—Internet

Tennis legend Navratilova has breast cancer

WASHINGTON, 8 April — Tennis legend Martina Navratilova revealed Wednesday she has been diagnosed with breast cancer.

The 53-year-old, who won 18 Grand Slam titles including nine Wimbledon singles titles, said she cried after finding out she had the disease.

Navratilova, 53, said when she heard the diagnosis she felt she had suffered her "personal 9/11." "I was devastated," she told ABC television's "Good Morning America" on being diagnosed in February, when a routine mammogram revealed a cluster in her left breast.

She explained she had had a lumpectomy, that doctors had found the dis-

ease had not spread to her lymph nodes and that there was a "very small chance" of the cancer recurring.

"It is just in that one breast," Navratilova said. "I'm OK and I'll make a full recovery."

But she said that emotionally it had been a difficult time.

"I'm this healthy person, I've been healthy all my life, and all of a sudden I have cancer. Are you kidding me?" she said.

Navratilova told US magazine People: "It knocked me on my ass, really. I feel so in control of my life and my body, and then this comes, and it's completely out of my hands."

According to the report,

US tennis legend Martina Navratilova.

Marseille beat Sochaux to go top

PARIS, 8 April — French League Cup winners Marseille were the latest team to go top of the French league in what is turning into a thrilling title race, with a 3-0 victory over Sochaux on Wednesday.

The eight-time champions, whose last title in 1992 was under the present coach Didier Deschamps' captaincy, hold a two-point lead over seven-time champions Lyon, Montpellier and Auxerre, but Marseille have a game in hand on them.

Defending champions Bordeaux - who were beaten by Deschamps' side in the League Cup final to land their first silverware since 1993 - are three points adrift of Marseille with a game in hand.

Marseille had the three points wrapped up by half-time as Argentinian defender Gabriel Heinze and French international midfielder Hatem Ben-Arfa

struck, the latter with a penalty.

International Ivory Coast striker Bakari Kone grabbed the third in time added-on in the second-half with a delightful lob to send Marseille top of the league for the first time this campaign.—Internet

Marseille's forward Brandao celebrates his goal against Sochaux during their French LI football match at Velodrome stadium in Marseille, southern France. Marseille won 3-0.—INTERNET
